

KMAP HOSPITAL BULLETIN 17004

POA Indicators

Effective with dates of service on and after March 3, 2017, present on admission (POA) indicators will be required for External Cause of Injury (ECI) diagnosis codes. These codes are reported on Line 72 of the UB-04 paper claim form or the H101-9 segment including the ABN qualifier within the 2300 loop of the electronic claim.

Reference Chapter 20 of the *International Classification of Diseases, 10th revision, Clinical Modification (ICD-10-CM)* publication for a complete list of ECI diagnosis codes.

Effective January 1, 2011, the following POA indicators were considered valid when submitted with a claim exempt from POA reporting:

- A “1” is valid for paper claims only.
- A blank space is valid for electronic claims only.

Claims containing an invalid POA indicator for an exempt diagnosis submitted between January 1, 2011, and March 2, 2017, will result in an overpayment and will be reprocessed by the Kansas Medical Assistance Program.

The appropriate updates will be made to the UB-04 claim instructions and *Hospital Fee-for-Service Provider Manual* in the near future.
