

**GENERAL BULLETIN 20209**

## **KMAP Provider Revalidation Clarification**

Beginning November 1, 2020, providers who are due to revalidate with KMAP but recently recredentialed with an MCO will be allowed a one-time 90-day grace period and recredentiaing will not be required again until the next revalidation period. Meaning, if a provider recredentialed with the MCO(s) within the 90-days prior to their revalidation being due with KMAP the recredentiaing will not need to be redone with the MCO for the current revalidation period. The MCO will reset the next recredentiaing due date to match the KMAP revalidation due date.

When a provider newly enrolls or revalidates with KMAP, the MCO will set the provider's recredentiaing due date to match the revalidation due date in KMAP/Kansas Modular Medicaid System (KMMS). The MCOs will send notification to the applicable providers indicating recredentiaing needs to be completed. The provider will also receive a revalidation Application Tracking Number (ATN) from KMAP so they can log into the KMAP website to complete the revalidation process. The revalidation and all associated documents will then be submitted to the MCO(s).

Providers should complete their revalidations on the [KMAP](#) website. Providers can contact KMAP Provider Enrollment at 1-800-933-6593, option 3, with questions or concerns.
