

JANUARY 2022

**KMAP GENERAL BULLETIN 21271**

## **COVID-19 Moderna Low Dose Booster Update**

Effective retroactively to dates of service on and after November 19, 2021, the Moderna low dose booster procedure code 91306 has been approved by the Food and Drug Administration (FDA) and Centers for Disease Control (CDC) for Emergency Use Authorization (EUA) for ages 18 and older.

Vaccine and booster codes that only have EUA for administration are not included in the Vaccine for Children (VFC) program.

Providers are not required to bill the vaccine code, only the applicable administration code.

Correct coding guidelines, Food and Drug Administration (FDA), and Centers for Disease Control (CDC) recommendations must be followed. View the CDC recommendations [here](#).

**Note:** The effective date of the policy is November 19, 2021. The implementation of State policy by the KanCare managed care organizations (MCOs) may vary from the date noted in the Kansas Medical Assistance Program (KMAP) bulletins. The **KanCare Open Claims Resolution Log** on the KMAP [Bulletins](#) page documents the MCO system status for policy implementation and any associated reprocessing completion dates once the policy is implemented.
