

JANUARY 2025

KMAP GENERAL BULLETIN 25008

Pharmaceuticals with DME Billing Allowance Updates

Effective with dates of service retroactive to September 1, 2023, coverage for J3241 will be expanded to include Provider Type/Provider Specialty 25/250 (Durable Medical Equipment [DME]/Medical Supply Company).

For Fee-for-Service (FFS) providers, a separately billed non-drug service fee for drug handling will be allowed.

- Code 99199 with modifier U3 should be used to bill for reimbursement for the handling and will be reimbursed at \$50 for each administration of the drug.

Managed Care Organization (MCO) providers will follow the Kansas Medical Assistance Program (KMAP) [UPDATED General Bulletin 24232](#) for handling fee guidance.

Billing Guidelines:

- The provider that prepares the product for administration may bill the handling fee.
- The provider that administers the product may bill the administration fee.

All other medical billing rules apply.

Note: The effective date of the policy is September 1, 2023. The implementation of State policy by the KanCare MCOs may vary from the date noted in the KMAP bulletins. The **KanCare Open Claims Resolution Log** on the KMAP [Bulletins](#) page documents the MCO system status for policy implementation and any associated reprocessing completion dates once the policy is implemented.
