

KMMS Go-Live: Implementation Date Change

The implementation of the new Kansas Modular Medicaid System (KMMS) as previously announced, is being rescheduled to **April 4, 2022**. Additional notifications will be distributed to provide the updated dates for transitioning to KMMS due to the new Go-Live date.

Please continue following instruction as noted below for the new KMAP Provider Secure Portal registration.

New KMAP Provider Secure Portal

The new KMAP Provider Secure Portal is currently open for **REGISTRATION ONLY**. Providers will use information from the registration letter sent to the super users (administrators) in December of 2021, along with the new 14-digit KMAP provider ID, to complete the registration process.

Providers **must** register to use the new KMAP Provider Secure Portal. The administrator must complete the registration before anyone within the organization will have access as a delegate. The registration is completed using the KMMS 10-digit base of the new KMAP Provider ID. Delegates for each service location will be granted access by the provider organization's administrator.

After successful registration, the administrator and all delegates will receive an email from the KMMS Identity Management system, which includes the URL of the new KMAP Provider Secure Portal logon page that will be used after KMMS Go-Live.
