ORTHOTIC DEVICES - SCOLIOSIS PROCEDURES

The orthotic care of scoliosis differs from other orthotic care in that the treatment is more dynamic in nature and utilizes ongoing, continual modification of the orthosis to the patient's changing condition.

This coding structure uses the proper names - or eponyms - of the procedures because they have historic and universal acceptance in the profession. It should be recognized that variations to the basic procedures described by the founders/developers are accepted in various medical and orthotic practices throughout the country, all procedures include model of patient when indicated.

Scoliosis - Cervical - Thoracic - Lumbar - Sacral (Milwaukee)
