	DRG Weights and Rates	

FORMS All forms pertaining to this provider manual can be found on the KMAP public and secure websites.

DISCLAIMER: This manual and all related materials are for the traditional Medicaid fee-for-service program only. For provider resources available through the KanCare managed care organizations, reference the KanCare website. Contact the specific health plan for managed care assistance.

CPT® codes, descriptors, and other data only are copyright 2026 American Medical Association (or such other date of publication of CPT). All rights reserved. Applicable FARS/DFARS apply. Information is available on the American Medical Association website.

PART II
HOSPITAL FEE-FOR-SERVICE PROVIDER MANUAL

Updated 01/18

This is the provider specific section of the manual. This section (Part II) was designed to provide information and instructions specific to hospital providers. It is divided into three subsections: Billing Instructions, Benefits and Limitations, and Appendices.

The **Billing Instructions** subsection provides directions on how to complete and submit the billing forms applicable to hospital services.

The **Benefits and Limitations** subsection defines specific aspects of the scope of hospital services allowed within KMAP.

The **Appendices** contain information concerning codes, the hospital cost report, and DRG Weights and Rates.

Access to Records
Kansas Regulation K.A.R. 30-5-59 requires providers to maintain and furnish records to KMAP upon request. The provider agrees to furnish records and original radiographs and other diagnostic images which may be requested during routine reviews of services rendered and payments claimed for KMAP consumers. If the required records are retained on machine readable media, a hard copy of the records must be made available.

The provider agrees to provide the same forms of access to records to the Medicaid Fraud and Abuse Division of the Kansas Attorney General's Office upon request from such office as required by K.S.A. 21-3853 and amendments thereto.

Confidentiality & HIPAA Compliance
Providers shall follow all applicable state and federal laws and regulations related to confidentiality as part of the Health Insurance Portability and Accountability Act (HIPAA) in accordance with section 45 of the code of regulations parts 160 and 164.

KMAP Audit Protocols
The KMAP Audit Protocols are available on the Provider page of the KMAP website under the *Provider Documents* heading.

7000. UB-04 Updated 03/26

Introduction to the UB-04

Hospital providers must use the UB-04 paper or equivalent electronic claim form when requesting payment for medical services and supplies provided under KMAP. Claims can be submitted on the KMAP secure website~~, through Provider Electronic Solutions (PES),~~ or by paper. When a paper form is required, it must be submitted on an original, red claim form and completed as indicated or it will be returned to the provider.

An example of the UB-04 paper claim form and instructions are available on the KMAP public and secure websites on the Forms page under the **Claims (Sample Forms and Instructions)** heading.

The fiscal agent does not furnish the paper UB-04 claim form to providers. Refer to **Section 1100** of the *General Introduction Fee-for-Service Provider Manual*.

7010. MS-2126 Updated 05/17

Notification of Nursing Facility Admission/Discharge MS-2126
The completion of the MS-2126 (Notification of Nursing Facility Admission/Discharge) must be completed by the provider. The facility retains the original MS-2126 and submits a copy to the KanCare Clearinghouse. Submission of the MS-2126 is not required as a prerequisite for a hospital "reserve day". However, the MS-2126 must be retained in the member's file for documentation. Completion of the MS-2126 is not required for payment of a therapeutic reserve day.

The form and instructions are available on the KMAP public and secure websites on the Forms page under the **Member Information** heading. This form will need to be copied or duplicated by providers since neither the fiscal agent nor the State will furnish the form to providers.

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 9/19

Inpatient

Accommodation and Ancillary Charges

If the individual accommodation and ancillary services exceed the detail lines on the UB-04 claim form, providers may combine all similar revenue code charges together (e.g. lab, radiology) when necessary. Accommodation codes may also be 'lumped' together when necessary. This will not affect the reimbursement of the claim.

Admission MCO Responsibility

If the Medicaid member's inpatient hospital dates of service include both an MCO assignment and fee-for-service (FFS) coverage or is during a transition from one MCO to another, the entire stay will be considered for payment by the entity the member was assigned to at the time of admission. All other non-inpatient (ancillary) charges are the responsibility of the new MCO at the beginning of the first (1st) month of enrollment. Care coordination must take place between the transitioning MCOs. This applies to the following provider types and specialties for DRG payment.

PT	PT DESC	PS	PS DESC
01	Hospital	010	Acute Care
01	Hospital	011	Psychiatric
01	Hospital	012	Rehabilitation
01	Hospital	017	Tuberculosis
01	Hospital	400	Screening Brief Intervention Referral Treatment (SBIRT)

Admission and Readmission (Same Day)

Admission

An inpatient admission starts when the physician writes an order for an inpatient admission. It is not considered inpatient until the order has been written. Documented verbal admission orders are considered the same as written orders.

- Scenario #1: A patient is sent to the medical floor on September 23 at 11:00 p.m. The physician writes an order to admit the patient on September 24 at 3:00 a.m. According to KMAP, the inpatient admission starts on September 24 at 3:00 a.m.
- Scenario #2: A physician writes an order for a patient to be admitted inpatient on September 23 at 11:00 p.m. The patient arrives on the medical floor on September 24 at 3:00 a.m. According to KMAP, the inpatient admission starts on September 23 at 11:00 p.m.
- Scenario #3: A physician contacts a hospital on September 23 at 11:00 p.m. about a direct admission and gives a verbal order for admission once the patient arrives at the hospital. The patient arrives at the hospital on September 24 at 3:00 a.m. According to KMAP, the inpatient admission starts on September 24 at 3:00 a.m.

Readmission (Same Day)

When a patient is discharged or transferred from an inpatient hospital and is readmitted to the same inpatient hospital on the same day for symptoms related to or for evaluation and management of the prior stay's medical condition, hospitals must combine onto a single claim. If a claim for the first stay has already been filed and paid, the hospital must initiate an adjustment and combine both the original and subsequent stay onto a single claim.

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 03/26

Admission and Readmission (Same Day) continued

When a patient is discharged or transferred from an inpatient hospital and is readmitted to the same inpatient hospital on the same day for symptoms unrelated to or not for evaluation and management of the prior stay's medical condition, hospitals must bill for two separate stays on two separate claims.

When a member is transferred from inpatient acute care using patient discharge status 62 (Discharged/Transferred to an Inpatient Rehabilitation Facility (IRF) Including Rehabilitation Distinct Part Units of a Hospital) or code 65 (Discharge/transferred to a psychiatric hospital or psychiatric distinct part unit of a hospital) it will be considered a transfer if a patient is admitted to a distinct unit (rehabilitation or psychiatric) within the same facility. The facility will bill two separate claims and each claim will be paid on the DRG specified.

Attending Provider

The attending provider's National Provider Identifier (NPI) and name are required on all institutional claims. All institutional claims submitted on paper, ~~through PES,~~ electronically, or through the KMAP web portal must have both the attending provider's NPI and name. Providers are required to submit this information correctly for the institutional claim to be accepted for processing. The attending provider must be enrolled with KMAP and have a valid NPI for claims to be considered for payment.

Donor Human Breast Milk

- Kansas Medicaid reimburses a medical care facility for prescribed medically necessary donor human breast milk for a critically ill infant under the age of 3 months who is in a neonatal intensive care unit of a hospital.
- A person who is licensed to practice medicine and surgery will order the donor human milk using established medical necessity guidelines. The parent or legal guardian of the member must sign and date an informed consent form indicating the risks and benefits of using banked human donor breast milk.
- The human donor breast milk must be obtained from a milk bank accredited by the Human Milk Banking Association of North America (HMBANA) or a milk bank in compliance with federal regulations governing the production and labeling of such items as covered by statutes in 21 CFR 100-169, and parts 105-107 dealing with infant foods.
- The milk must not be altered in composition, other than pooling with multiple donor mothers' milk to achieve target energy or protein goals and should provide a nutritionally complete product for a term infant, which does not have to be mixed with human milk to make it safe to feed. The milk must be pasteurized and remain in a frozen state.
- The appropriate revenue code for donor breast milk is 0220.

Emergency Renal Dialysis

Inpatient emergency renal dialysis must be billed using revenue code 809 in FL 42 of the UB-04 paper or equivalent electronic claim form.

End Stage Renal Disease

Providers can enroll to perform end-stage renal disease (ESRD) services with KMAP as a provider type and specialty 30/300 (Renal Dialysis Center).

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 12/25

Hospice

Payment for services related to the terminal illness or related conditions is the responsibility of the hospice provider. If the inpatient stay was not related to the terminal illness, submit a claim with a copy of the admission and discharge summary. If the member is only assigned to a hospice provider for a portion of the inpatient stay, submit a claim for the entire stay. The claim and documentation will be reviewed to determine if KMAP can reimburse for all or a portion of the stay or if the stay is the responsibility of the hospice provider.

Interim Billing

- Interim inpatient hospital billing is restricted to a frequency of no more than one interim claim every 30 days. Providers can bill less frequently if desired. Interim bills received more frequently than 30 days will be denied, except for those from state institutions. There is not a limitation on the frequency for state institutions.
- When interim billing, be sure to enter the appropriate "Type of Bill" code (e.g. 112, 113, 114). A "Patient Status" code of 30 (current patient) must be indicated when Type of Bill is 112 or 113.
- Each interim claim will be processed as its own "encounter" and reimbursement will be based on the DRG base rate and any applicable day or cost outlier payments. Upon submission of the final bill, the entire length of the stay will be reconciled, and a final payment will be issued, or overpayment will be recouped, whichever is appropriate.

Inpatient Pharmaceutical Coverage

Effective with service dates on or after January 1, 2026, Kansas Medicaid does not cover non-rebate eligible pharmaceuticals that cost more than $100K, when billed as part of an inpatient stay.

For rebate status, refer to Medicaid's website at:
https://www.medicaid.gov/medicaid/prescription-drugs/medicaid-drug-rebate-program/medicaid-drug-rebate-program-data

Drug Revenue Codes:
Possible inpatient claim drug revenue codes to review are listed below. For the most current list of revenue codes, please refer to the Noridian Medicare website at:
https://med.noridianmedicare.com/web/jea/topics/claim-submission/revenue-codes

Revenue Code	Description
025**X**	Pharmacy (Also see 063X, an extension of 250X)
026**X**	IV Therapy
0294	Supplies/Drugs for DME
063**X**	Pharmacy - Extension of 025X
089**X**	Pharmacy - Extension of 025X and 063X

Post-pay Review:

- Inpatient claims with revenue codes designated for pharmaceutical billing and total charges exceeding $100,000 will be subject to post-payment review for coverage determination.
- If a claim is flagged as potentially including non-covered pharmaceuticals, the provider may be required to:
  - Submit a detailed claims report, including but not limited to drug invoices, NDC (National Drug Code) information, and other supporting details to assist the state in its review.
  - Void and resubmit the inpatient claim excluding any non-covered pharmaceutical charges, if instructed.

Maternity Center Services

Labor and delivery in a maternity center setting is covered for Medicaid and MediKan members. The appropriate procedure code to be billed is 59409. To receive reimbursement, maternity centers must be licensed be the State of Kansas (or equivalent if located in another state) and enrolled as a provider in KMAP. Maternity Center fees should be billed on a UB04, using type of bill 84X and revenue code 0724. All other billing instructions will remain the same.

The list below is inclusive and applicable to the service provided:

- Reimbursement is on a fee-for- service basis.
- Maternity center services are exempt from member copayment.
- Maternity center services are exempt from primary care case manager (PCCM) referral.
- Supplies are content of service of labor and delivery chargers.

Medicare A Exhaustion of Benefits

- Once Medicare Part A regular inpatient benefits are exhausted, dual-eligible members (those who have both Medicaid and Medicare) can only receive a Medicaid payment if they have already used their LTR days or elect to use their LTR days. A Kansas Medicaid member must make a written election not to use LTR days and cannot be "deemed" to have elected not to use LTR days. If a member makes a written election not to use LTR days after the regular inpatient days are exhausted, Medicaid will not issue payment for any part of the inpatient stay which would have been covered if the member had elected to use LTR days.
- After making a written election not to use LTR days, a member can still decide to use LTR days. KMAP will accept the written election form outlined by Medicare in Chapter 5 of the *Medicare Benefit Policy Manual*.
- If benefits were exhausted prior to hospital admission, LTR days are available for the entire stay, and the member elects not to use LTR days, submit a no pay bill (third digit of TOB is zero).

Medicare A Exhaustion of Benefits continued

- If benefits were exhausted during the hospital stay and the member elects not to use available LTR days:
  - Bill condition code 67
  - Bill the number of covered days for which benefits were available
  - Bill the number of noncovered days for which the member elected not to use LTR days
- If benefits were exhausted during the hospital stay and the member elects to use LTR days:
  - Bill all days as covered if there were sufficient LTR days for the stay.
  - If LTR days are available for only a portion of the stay, bill occurrence code A3 with the from date indicating the day all benefits (including LTR days) were exhausted.
  - Bill all days as covered for Medicaid.
- If all benefits are exhausted (including LTR days):
  - Bill occurrence code A3 with the from date indicating the day benefits were exhausted.
  - Bill all days as coved for Medicaid.

Medicare B Services

When Medicare B payment is made on an inpatient claim, indicate the amount paid as Prior Payment in FL 54 on the UB-04 paper or equivalent electronic claim form.

Newborn Services (When the birth mother is assigned to an MCO)

Notify the managed care organization (MCO) that the mother is assigned to at the time of birth. The MCO will provide further instructions if the provider is part of that MCO's network. The mother's MCO will notify KMAP and the fiscal agent of the birth.

Newborn Services (When the birth mother is NOT assigned to an MCO)

- Only procedure codes which specifically state "newborn" in the code description according to the *CPT* codebook are considered newborn services. These services can be paid under the mother's member ID number for the first 45 days after the baby's date of birth. These services must be billed with a newborn diagnosis code to receive payment.
- When billing newborn services for a newborn who does not have a member ID number, use "Newborn", "Baby Girl", or "Baby Boy" in the first name field and enter the last name. Use the newborn's date of birth and the mother's member ID number.

  Claims for newborn services billed under the mother's member Identification (ID) number may be suspended for 30 days pending receipt of the newborn's member ID number from the eligibility system. If a newborn ID is received, the claim will be denied notifying the provider they must submit the claim using the newborn's ID number.

  If no newborn ID is received and the date of service is within 45 days of the newborn's date of birth, the claim may be paid using the mother's ID number. If the date of service is not within 45 days of the newborn's date of birth, the claim will be denied.

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 01/24

Outpatient/Inpatient

For all hospitals except critical access hospitals, outpatient procedures (including, but not limited to, surgery, X-rays, and EKGs) provided within three days of a hospital admission **for the same or similar diagnosis** are considered content of service and must be billed on the same inpatient hospital claim. The **Statement covers** period should encompass all services on the claim, except when an outpatient procedure is reported on the inpatient claim. In this specific instance, the date may not be more than three days prior to the date of admission.

Note: There is one exception to this policy: complications from an outpatient sterilization resulting in an inpatient admission. In this instance, the outpatient charges and the inpatient charges should be billed on two separate claims. This is necessary for the service dates on the claim form to match the service dates on the Sterilization Consent Form.

- KMAP will no longer consider critical access hospital outpatient procedures (including, but not limited to, surgery, X-rays, and EKGs) provided up to three days before a hospital admission for the same or similar diagnosis as content of service to the inpatient claim. Critical access hospitals must bill services prior to the point of admission as outpatient.

Outpatient Services Provided During Inpatient Admission

Outpatient services provided during an inpatient hospital stay must be included by the hospital on the UB-04 paper or equivalent electronic claim form and reimbursed through the DRG. The outpatient provider should receive reimbursement from the hospital. Outpatient services provided to residents of state institutions must be billed by the hospital providing the outpatient service.

Present on Admission Indicators

- All claims involving inpatient admissions to general acute care hospitals will require submission of present on admission (POA) indicator(s). POA is defined as present at the time the order for inpatient admission occurs – conditions that develop during an outpatient encounter, including emergency department, observation, or outpatient surgery, are considered as POA.
- POA and Health Care Acquired Conditions (HCAC) requirements apply to all inpatient settings, including critical access, long-term care, cancer, and children's hospitals as well as freestanding psychiatric and rehabilitation facilities. Effective with dates of service on and after February 1, 2024, swing bed NF claims (bill type 180 -189) are excluded from the POA billing requirements.
- The POA indicator is assigned to principal and secondary or other diagnoses (as defined in Appendix I of the *Official Coding Guidelines for Coding and Reporting*) and the external cause of injury (ECI) codes (Chapter 19 ICD-10-CM). The validity of the POA indicator will be edited, and claims are subject to denying when the POA indicator is invalid. The hospital will need to supply the correct POA indicator(s) and resubmit the claim. ECI codes (Chapter 20 ICD-10-CM) are exempt from POA reporting.

- **POA Indicators and Definitions**
  - Y (for yes): Present at the time of inpatient admission.
  - N (for no): Not present at the time of inpatient admission.
  - U (for unknown): The documentation is insufficient to determine if the condition was present at the time of inpatient admission.
  - W (for clinically undetermined): The provider is unable to clinically determine whether the condition was present at the time of inpatient admission or not.

Present on Admission Indicators continued

- For those exempt from POA reporting:
  - For a 4010A1 claim billing an exempt diagnosis code, use POA indicator 1.
  - For a 5010 claim billing an exempt diagnosis code, leave the POA indicator field blank.
  - For a hardcopy claim billing an exempt diagnosis, use POA indicator 1.

Note: The *ICD-10-CM Official Guidelines for Coding and Reporting* includes a list of diagnoses codes that are exempt from POA reporting.

- KMAP will not pay the complication comorbidity/major complication comorbidity (CC/MCC) DRG for those selected hospital acquired conditions (HACs) that are coded as "U" for the POA indicator. KMAP will not pay the CC/MCC for those selected HACs that are coded as "1" for the POA indicator or those left blank. The "1" or blank POA indicator should not be applied to any codes on the HAC list. These claims will deny as ungroupable, and providers will need to correct and resubmit the claim for reimbursement. HAC information is available on the CMS website.
- These POA guidelines are not intended to replace any found in the *ICD-10-CM Official Guidelines for Coding and Reporting* nor are they intended to provide guidance on when a condition should be coded. They should be used in conjunction with the *UB-04 Data Specifications Manual* and the *ICD-10-CM Official Guidelines for Coding and Reporting* to facilitate the assignment of the POA indicator for each “principal” diagnosis and “other” diagnoses codes reported on claim forms (UB-04 and 837 Institutional).

Psychiatric Observation Beds

When an inpatient hospital admission follows a psychiatric observation stay, the observation days should be billed on the inpatient claim. The observation bed days then become part of the DRG payment to the hospital.

Transfers

When billing medically necessary incoming transfers, enter "direct transfer from (hospital, city)" in FL 80 under "Remarks" on claims for incoming transfers from other hospitals.

Swing Bed Nursing Facility

When billing for a swing bed nursing facility (NF), the following must be observed:

- Your hospital must be certified by the Kansas Department of Health and Environment (KDHE) as a swing bed NF hospital.
- The facility retains the original MS-2126 and submits a copy to the KanCare Clearinghouse. (Refer to **Section 7010** of this manual.) The KanCare Clearinghouse will notify the facility when payment is approved or denied. The facility will also be notified of the effective date and any applicable patient liability.
- Providers must bill the full amount and patient liability will be deducted during processing. When billing for a swing bed, a separate claim must be submitted for each calendar month.

***Note*: Do not** attach a copy of either the MS-2126 or Notice of Action to your claim form.

Swing Bed Nursing Facility continued

- Bill all NF days for eligible Medicare patients to Medicare first. Medicaid can be billed for any remaining amounts using the inpatient Medicare claim crossover method. (Refer to Section 3200 of the General TPL Payment Fee-for-Service Provider Manual.) If Medicare will not pay for the NF days, a copy of either the Medicare Report of Eligibility (ROE) or a Medicare denial must be attached to the Medicaid billing supporting nonpayment by Medicare.
- Before a transfer to a swing bed NF occurs, the patient must be discharged from the inpatient unit. Use the appropriate three-digit type of bill code in FL 4 on the UB-04 paper or electronic equivalent claim form. (Refer to **Section 7000** of this manual.)
- Remember, the inpatient unit is not reimbursed for the date of discharge since the swing bed NF will be reimbursed for the date of admission.
- The appropriate accommodation revenue code applicable to the patient's level of care must be entered in FL 42. Bill the total number of days in FL 46 (units). In FL 47, place the total charge of days billed. For further information on per diem supplies and services, including durable medical equipment, pharmacy, therapy, transportation, and miscellaneous items, refer to **Section 8400** of the *Nursing/Intermediate Care Facility Fee-for-Service Provider Manual*.

  Ancillary charges: Cannot be billed on the swing bed NF claim. Any ancillary services received by the patient while in a swing bed NF, must be billed on a UB-04 paper or electronic equivalent claim form using the outpatient type of bill code (FL 4) and the correct Healthcare Common Procedure Coding System (HCPCS) code and revenue code for the ancillary services provided. Indicate condition code D9 (any other change) in FL 18-28 and enter the from and through dates of service in FL 6 on the UB-04 paper or electronic equivalent claim form. When multiple dates of service are being billed, enter only the first date of service in FL 45 on the UB-04 paper or electronic equivalent claim form.

  Pharmacy: Pharmacy services for swing bed claims need to be billed on a pharmacy claim form from a Medicaid-enrolled outpatient pharmacy. Refer to the *Pharmacy Fee-for-Service Provider Manual* for billing instructions and coverage information.

  Supplies: When billing for supplies provided by the swing bed facility over and above the supplies included in the reimbursement rate, use procedure code 99070 – bill one unit per day. Claims must include both revenue codes and HCPCS codes.

  POA indicators: Effective with dates of service on and after February 1, 2024, POA indicators are not required on swing bed services.

- Except the billing guidelines addressed above, the remainder of the claim form is to be completed in the same manner as an inpatient submission. (Refer to instructions in **Section 7000** of this manual.)

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 03/26

Outpatient

Note: Outpatient hospital claims which require medical necessity documentation may be billed electronically. Medical necessity documentation must be retained in the provider's file and made available for review on a postpay basis. It is not required for providers to roll-up their charges into the covered code they are billing. Providers can bill the code they are providing, and the processing system will allow the covered charges and deny the services that are content or noncovered.

Revenue codes should not be indicated for outpatient services. Use appropriate Current Procedural Terminology (CPT) and HCPCS codes. Enter the time of day using the continental time system if the services are provided between 6:00 p.m. and 8:00 a.m. (1800 and 0800 hours) in FL 13, admission hour.

Attending Provider

The attending provider's NPI and name are required on all institutional claims. All institutional claims submitted on paper, ~~through PES,~~ electronically, or through the KMAP web portal must have both the attending provider's NPI and name. Providers are required to submit this information correctly for the institutional claim to be accepted for processing. The attending provider must be enrolled with KMAP and have a valid NPI for claims to be considered for payment.

Bilateral Procedures

Bilateral procedures performed during the same operative session shall be billed with the appropriate code. To be consistent with Medicare, if a procedure is identified in the *CPT* codebook as one that should have modifier 50 added when performed bilaterally, bill the procedure as a single line item with modifier 50. For example, to bill the excision of bilateral nasal polyps, the provider should indicate code 3011050 on one detail line on the claim. Reimbursement will be made for the bilateral procedure.

DME Purchase/Rental

DME services (purchase or rental) are noncovered in nursing facilities, swing bed facilities, state institutions, Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICFs-IID), psychiatric residential treatment (PRTF) facilities, brain injury (BI) facilities, rehab facilities, and hospitals. For further information, refer to **Section 8400** of the *Nursing/Intermediate Care Facility Fee-for-Service Provider Manual*.

External Cause of Morbidity Codes

External causes of morbidity codes are accepted on a claim as a secondary diagnosis when billed in conjunction with a covered primary diagnosis code.

Emergency Renal Dialysis

Outpatient emergency renal dialysis must be billed using the following diagnosis codes in FL 67 of the UB-04 paper or electronic equivalent claim form:

O084	T795XXA	N170	N171	N172	N178
N179	O0382	O0482	O0732	O904	

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 10/16

Emergency Room/Department Services

- Enter the time of day (using the continental time system, such as 0000-2300) in FL 13, admission hour.
- Emergency services provided in the emergency department must be billed using the appropriate evaluation and management (E&M) emergency department or critical care procedure code from the *CPT* codebook.
- Reference the *CPT* codebook for information on the CMS and American Medical Association (AMA) documentation guidelines as well as directions for assigning codes for emergency services. Copies of "detailed" documentation guidelines have been published by CMS.
- E&M procedure codes applicable to emergency department services include:
  99281 99282 99283 99284 99285 99291 99292

  Modifier ET will be informational only. Hospitals will no longer need to bill modifier ET with these codes for facility charges.

  Note: Refer to the *CPT* codebook for procedure code nomenclature.
- Nonemergent emergency room encounters must be billed using 99281.
  - For one facility charge and one professional charge, only one ER code (99281-99285) will be allowed to be billed per day per member regardless of provider.
  - Medical necessity documentation must accompany the claim when more than one ER visit is made on the same day for the same individual.
  - Emergency room encounters must be billed appropriately.
  - Medical records may be reviewed for coding accuracy of professional claims.
  - Physician services provided in an outpatient hospital setting and ambulatory surgical centers must be billed on the CMS 1500 Claim Form paper version or electronic equivalent.
  - Outpatient hospitals must bill facility charges on the UB-04 paper or equivalent electronic claim form.
- **Type B Emergency Departments –** A Type B emergency department is defined as an emergency department that meets the definition of a "dedicated emergency department" as defined in 42 CFR 489.24 under the EMTALA regulations. The following codes are covered KMAP services and should be used by Type B Emergency Departments:
  G0380 G0381 G0382 G0383 G0384
- It must meet at least one of the following requirements:
  - It is licensed by the State in which it is located under applicable state law as an emergency room or emergency department.
  - It is held out to the public (by name, posted signs, advertising, or other means) as a place that provides care for emergency medical conditions on an urgent basis without requiring a previously scheduled appointment.
  - During the calendar year immediately preceding the calendar year in which a determination under 42 CFR 489.24 is being made, based on a representative sample of patient visits that occurred during that calendar year, it provides at least one-third of all of its outpatient visits for the treatment of emergency medical conditions on an urgent basis without requiring a previously scheduled appointment.
- Medical supplies and injections (99070 and J7030- J7121) are considered content of service of the ER visit.

7020. HOSPITAL SPECIFIC BILLING INFORMATION Updated 03/26

Locum Tenens Physicians

- Locum tenens physicians must not be in place for more than one year.
- It is the provider's responsibility to ensure a locum tenens physician covering for a KMAP provider is not excluded from participation in governmental programs including Medicaid.
- Upon review of claims, payments will be recouped if it is determined that KMAP paid for a service that was provided by a locum tenens physician who was excluded from participation in governmental programs including Medicaid on the date of service.

Mid-Level Provider

- Physician assistants (PAs) and advanced practice registered nurses (APRNs) must be enrolled as Medicaid providers to bill for services. Indicate the PA's or APRN's number as the attending physician on the UB-04 paper or electronic equivalent claim form.
- APRNs and PAs are reimbursed 75% of the Medicaid allowed amount for services provided.

Observation Room

- Currently, code G0378 is billed for outpatient services. This code replaces 99218ET.
- Medical supplies and injections (99070, J7030-J7121) are considered content of service of the observation room services.

Physician Clinic Services

- Currently, some physicians make scheduled visits once or twice a week to rural hospitals and see patients in an outpatient hospital room which functions as their office. Physician clinic services provided in a hospital location are considered content of the physician service and should not be billed to Medicaid or the member.
- Currently, the hospital can bill G0463 for the use of the room. G0463 is not considered content of surgery.

Professional Fees

- ~~The only physician services which can be billed by the hospital on the UB-04 paper or electronic equivalent claim form are hospital-based physicians assigned to the emergency department.~~
- Currently, the hospital is no longer allowed to bill hospital-based physician professional fees.

Professional/Technical Component Billing

- **Components**
  - **Professional**
    In Field 24D, enter the HCPCS base code for services rendered, including **modifier 26** (example: **7207026**). ***Note:*** Modifier 26 is not covered for a hospital provider.
  - **Technical**
    In Field 24D, enter the HCPCS base code of the service performed, including **modifier TC** (example: **72070TC**). Effective August 1, 2024, Hospitals billing the base code for radiology procedures will not be reimbursed at the TC rate. The radiology services will be reimbursed at the base rate if a base code is billed and reimbursed at the modifier TC rate if a modifier TC is billed.
  - **Professional and Technical**
    In Field 24D, enter the HCPCS base code of the service performed (example: **72070**).

Professional/Technical Component Billing continued

- **The same procedures performed on the same day:**
  - Must be billed on the same claim
  - Must clarify the reason for billing more than one procedure (Example: two X-rays at two different times; left arm, right arm)
- When the same procedures are not billed on the same claim, the additional claim(s) will be denied as a duplicate. To seek reimbursement for additional services when this occurs, submit an underpayment adjustment using the internal control number (ICN) from the remittance advice (RA) of the paid claim **and** state on the adjustment request that more than one procedure was performed on the same day. Refer to **Section 5600** of the *General Billing Fee-for-Service Provider Manual* for details.

  Exception: Claims that have the same procedures performed on the same date of service but have different places of service should be billed on separate claims. Both claims must include the two-digit place of service code to process correctly and not deny as duplicate.

Prosthetic and Orthotic

- Hospitals must enroll as prosthetic and orthotic (P&O) providers and bill on the professional claim form (CMS 1500 paper or equivalent electronic claim form) or 837 professional transactions when providing these services. Contact Provider Enrollment at 1-800-933-6593.
- Prosthetic and orthotic items **cannot** be billed as ancillary services on the UB-04 paper or equivalent electronic claim form.
  Exception: Prosthesis implanted by a surgical procedure may be billed on the hospital claim form for inpatient services.

Sterilization Procedures

When a sterilization is performed in conjunction with or secondary to an **inpatient** procedure (such as delivery) and the sterilization is **not** covered (such as failure to obtain the Sterilization Consent Form), remove all codes and charges related to the sterilization from the claim and bill the primary procedure only. Carefully document in the medical record the reason the sterilization was not billed on the claim.

Supplies

- The hospital can bill code 99070 without the modifier ET for supplies. Modifier ET is no longer a valid modifier for 99070. Only one supply is allowed per day.

Unit Billing

When billing for outpatient hospital services, round units to the nearest whole number. Do not bill fractions of units.

Unlisted Procedure codes:

- Not Otherwise Classified (NOC) drug codes may not be used when other appropriate codes are available (Example: C-series or J-series codes), even if this results in using a code that is not covered by KMAP.

Professional/Technical Component Billing continued

- NOC drug codes should only be used when no other appropriate drug code can be used based on the HCPCS Guidelines.
- C-series codes can only be reported for outpatient facilities.
- Billing of any HCPCS code is not a guarantee of coverage or payment status.

Wrong Surgical or Other Invasive Procedure Performed on a Patient; Surgical or Other Invasive Procedure Performed on the Wrong Body Part; Surgical or Other Invasive Procedure Performed on the Wrong Patient.

- KMAP will not cover a surgical or other invasive procedure to treat a medical condition when the practitioner erroneously performs: 1) a different procedure altogether; 2) the correct procedure but on the wrong body part; or 3) the correct procedure but on the wrong patient. Medicaid will also not cover hospitalizations and other services related to these noncovered procedures.
  None of the erroneous surgeries or services is billable to the member.
- All services provided in the operating room when an error occurs are considered related and therefore are not covered. All providers in the operating room when the error occurs who could bill individually for their services must submit claims for these services but are not eligible for reimbursement for these services. These providers must submit separate claims for these services using the appropriate methods.

Inpatient Claims

- Hospitals are required to bill two claims when the erroneous surgery(s) is reported.
  - One claim with covered service(s)/procedure(s) unrelated to the erroneous surgery(s) on a type of bill (TOB) 11X (except 110)
  - One claim with the noncovered service(s)/procedure(s) related to the erroneous surgery(s) on a TOB 110 (no-pay claim)
    - The noncovered TOB 110 will be required to be submitted on the UB-04 (hard copy) claim form.

- Providers are required to report as an "other diagnosis" one of the applicable external causes of morbidity codes for wrong surgery performed:

  Y6551 Y6552 Y6553

  Note: These external cause of morbidity codes are **not** to be submitted in the external cause of morbidity codes field on the UB-04.

Outpatient, Ambulatory Surgical Centers, Other Appropriate Bill Types and Practitioner Claims:
Providers are required to append one of the following applicable modifiers to all lines related to the erroneous surgery(s):

- PA: Surgery Wrong Body Part
- PB: Surgery Wrong Patient
- PC: Wrong Surgery on Patient

7030. STATE INSTITUTION FOR MENTAL HEALTH Updated 05/17

Accommodation and Ancillary Charges

If the individual accommodation and ancillary services exceed the detail lines on the UB-04 paper or electronic equivalent claim form, providers may combine all similar revenue code charges together (e.g., lab, radiology) when necessary. Accommodation codes may also be 'lumped' together when necessary. This will not affect the reimbursement of the claim.

State institutions may bill for ancillary services without indicating an accommodation code.

Medicare B Services

When Medicare B payment is made on an inpatient claim, indicate the amount paid as Prior Payment in FL 54 on the UB-04 paper or electronic equivalent claim form.

Other Insurance

When a member has other insurance, proof of payment or denial is required. Enter the amount paid by the other insurance carrier in FL 54 on the claim form. Refer to **Section 3300** of the *General TPL Payment Fee-for-Service Provider Manual* for specific instructions on submitting claims when other insurance is involved.

Transfers

When billing medically necessary incoming transfers, the following should be entered on UB-04 paper claims for incoming transfers from other hospitals:
In FL 80, Remarks, enter "direct transfer from (hospital, city)."

Reserve Days

Indicate revenue code **189** in **FL 42** when billing for reserve days.

BENEFITS AND LIMITATIONS

8100. COPAYMENT Updated 12/23

Effective with dates of service on and after January 1, 2024, copayments will no longer apply to Kansas Medicaid Fee-for-Service (FFS) members. The mandatory managed care authority for KanCare is transitioning from the 1115 Waiver to the Medicaid State Plan and a 1915b Waiver. Copayments are being removed from the Medicaid State Plan and will not apply to FFS members.

Managed Care members will continue to be exempt from copayments.

BENEFITS AND LIMITATIONS

8200. MEDICAL ASSESSMENT Updated 01/22

Documentation

To verify services provided in a post payment review, documentation in the patient's medical record must support the service billed. Documentation can be requested at any time to verify that services have been provided within program guidelines. Refer to **Section 5000** of the *General Billing Fee-for-Service Provider Manual*. The information below indicates medical information which may be necessary to document medical necessity of those diagnoses designated as "sometimes payable" on the screen.

Abdominal Plain Films and Ultrasound

- Abdominal plain films and ultrasound are medically necessary if the diagnosis indicates abdominal pain, nausea/vomiting, complications associated with ulcers, intestinal obstruction, gall bladder disease, malignant neoplasm of the abdominal organs, injury to the abdomen or nephrolithiasis. It may be necessary to contact the ordering physician for medical necessity information.

- An abdominal plain film may be warranted in a pregnant patient if:
    - Fetal position is questionable.
    - Obstetrical ultrasound is unavailable, **and** patient is in labor.

Cardiac Rehabilitation

- Phase II Cardiac Rehabilitation is covered using procedure code 93798. This procedure is covered when performed in an outpatient or cardiac rehabilitation unit setting, with the following criteria:
    - Member must have a recent cardiology consultation within three months of starting the cardiac rehabilitation program.
    - Member must have completed Phase I Cardiac Rehabilitation.
    - Member must have one or more of the following diagnoses/conditions:
        - Acute myocardial infarction within the preceding three months, post inpatient discharge
            - Codes I2101, I2102, I2109, I2111, I2119, I2121, I2129, I213, I214, I220, I221, I222, I228, I229, I255, I256, I2589, and I259
        - Coronary bypass surgery within the preceding three months, post inpatient discharge
            - Code Z951
        - Stable angina pectoris within three months post diagnosis
            - Codes I200, I201, I208, and I209

Colorectal Screenings

KanCare will cover the colorectal cancer screening procedures recommended by American Cancer Society. One of the following colorectal cancer screening tests should be used based upon clinical presentation:

- Fecal occult blood testing (iFOBT),
- Fecal immunoassay testing (FIT),

Colorectal Screenings continued

- Multi-targeted stool DNA (mt-sDNA),
- Sigmoidoscopy or colonoscopy for adults 45 to 75 years of age.

Intervals for recommended screening strategies:

Visual (structural) exams of the colon and rectum:

- Colonoscopy every 10 years
  - G0105, G0120, or G0121
- Flexible sigmoidoscopy (FSIG) every five years
  - G0104 or G0106

Stool-based test:

- Highly sensitive fecal immunochemical test (FIT) 82274
- Highly sensitive guaiac-based fecal occult blood test (gFOBT) 82270
- Multi-targeted stool DNA (mt-sDNA) every three years 81528

CT SCANS – Abdominal

- A CT scan of the abdomen is medically necessary if the diagnosis indicates a malignant neoplasm of the intra-abdominal cavity, lung or genital organs, lymphoma, diseases of the spleen, liver abscess, peritonitis, pancreatitis, abdominal trauma, or abdominal mass.
- A CT scan of the abdomen **may** be medically necessary for abdominal pain, abdominal aneurysm, acute lymphocytic leukemia, or any malignant neoplasm not located in the intra-abdominal cavity, lung or genital organs. Inclusion of the following documentation will assist in the adjudication of your claim.
  - **Abdominal pain:** Indicate the severity and chronicity of the pain, presenting symptoms and suspected conditions or complications.
  - **Abdominal aneurysms:** Indicate the presenting symptoms and suspected complications.
  - **Acute lymphocytic leukemia:** Indicate the presenting symptoms and a detailed description of area(s) involved.
  - **Malignant neoplasm not located in the intra-abdominal cavity, lung, or genital organs:** Indicate pertinent symptoms and if performed as part of staging the disease process.
- It may be necessary to contact the ordering physician for medical necessity information.

CT Scans – Head or Brain

- A CT scan of the head or brain is medically necessary if the diagnosis indicates intracranial masses/tumors, intracranial congenital anomalies, hydrocephalus, brain infarcts, parencephalic cyst formation, open or closed head injury, progressive headache with or without trauma, intracranial bleeding, aneurysms, or the presence of a neurological deficit.
- A CT scan of the head or brain may also be medically necessary with the indication of headache, epilepsy, syncope, dizziness, or acute lymphocytic leukemia. Inclusion of the following documentation will assist in adjudication of your claim:

CT Scans – Head or Brain continued

- **Headache:** Indicate length of chronicity and any accompanying central nervous system (CNS) symptoms.
- **Epilepsy:** Specify if initial or repeat scan, indicate if suspected injury occurred during seizure.
- **Syncope:** Specify if recurrent or single episode.
- **Dizziness:** Specify if recurrent or single episode.
- **Acute lymphocytic leukemia:** Indicate any accompanying CNS symptoms.

- It may be necessary to contact the ordering physician for medical necessity information.

Electrocardiograms

- Electrocardiograms (EKGs), up to 12 leads, are covered if medical necessity is met.
- Preoperative EKGs are medically necessary for patients over 40 years of age or those patients under 40 with a history of cardiac problems.
- It may be necessary to contact the ordering physician for medical necessity information.
- **History:** The age of a patient is a component of every medical record. Documentation of age in relationship to issues such as antisocial behavior or mental status is important; however, age alone is not considered a social history.
- **Examination:** A "comprehensive exam" is considered a "hands on" specialist examination. Telephone consultation with a specialist is not the equivalent of comprehensive exam.
- **Medical decision making:** Transfers from the emergency department to another facility for additional care should be considered in management options as either the "new problem, additional work-up" or the category of "established problem, worsening."

Emergency Department/Room

Guidelines for E&M Codes

- A vascular examination is included in the cardiovascular category.
- A notation that the patient should "follow-up" with his family physician in the morning or return to the physician's office for stitch removal does not justify use of the "additional work-up" statement when considering management options.
- In evaluating the "Table of Risk", infection is the usual risk that pops into mind when talking about minor surgery. To consider infection as a "risk" from minor surgery, there must be documentation to support increased risk due to the quality or condition of the injury or illness.
- "Self-limited/minor problems" are defined as being representative of basic emergency department care such as lacerations, stings, insect bites.
- "New problems with or without additional work-up" is defined as new, long-standing problems that will need attention again at some time.

Hospital – Outpatient

General Information

- The State of Kansas defines emergency services as follows:
  - KAR 30-5-58 (42) "Emergency services are those services provided after the sudden onset of a medical condition manifested by symptoms of sufficient severity, including severe pain, that the absence of immediate medical attention could reasonably be

Hospital – Outpatient continued

expected to result in placing the patient's health in serious jeopardy, serious impairment of bodily functions, or serious dysfunction of any bodily organ or part."
    - KAR 30-5-81 (b) (4) "Services provided in the Emergency Department shall be emergency services."
- Emergency status is determined based on conditions relating to the emergency visit, not the member's age and time of admission to the emergency department. Emergency department claims are limited to one visit per member, per date of service unless accompanying documentation verifies the necessity for more than one emergency room/department visit.
- Direct physical attendance by a physician or mid-level practitioner is required in "emergency" situations. If the physician or mid-level practitioner has not made entries on the record other than his/her signature and/or diagnosis and documentation does not indicate that he/she had examined the member, the visit will not be considered emergent. Phone or standing orders do not support emergency treatment.
- Axillary temperatures are not considered accurate and will be disregarded when determining emergent status.
- Members may go to the emergency room without a referral from their physician based on the definition of an emergency according to a prudent layperson (as defined by the Balanced Budget Act, 1997): What a layperson would consider an emergency in the absence of medical knowledge. Such an emergency could include but is not limited to serious impairment to bodily functions; serious dysfunction of any bodily organ or part; severe pain; or an injury/illness that places the health of the individual in serious jeopardy (and in the case of a pregnant woman, her health or that of her unborn child).

  Other examples of emergencies are:
    - Initial treatment for medical emergencies including indications of severe chest pain, dyspnea, gastrointestinal hemorrhage, spontaneous abortion, loss of consciousness, status epilepticus, or other conditions considered "life-threatening".
    - Members who require transfer to another facility for further treatment or who expire.

  Nonemergent situations:
    - Intentional noncompliance with previously ordered medications and treatments resulting in continued symptoms of the same condition.
    - Refusal to comply with currently ordered procedures/treatments such as drawing blood for laboratory work.
    - Leaving the emergency room against medical advice.
    - Having previously been in the same or different emergency room or physician's office for the same condition and the condition had not worsened.
    - Scheduled visits to the emergency room for procedures, examinations, or medication administration. Examples include cast changes, suture removal, dressing changes, follow-up examinations, and second opinion consultations.
    - Visits made to receive a "tetanus" injection in the absence of other emergent conditions.
    - Visits made to obtain medication(s) in the absence of other emergent conditions.

Hospital – Outpatient continued

- Conditions/symptoms relating to the visit had been experienced longer than 48 hours or are of a chronic nature and emergency medical treatment to stabilize the condition was not required.

The following conditions will not be considered emergent unless the criteria described has been met.

- **Alcoholism:** In and of itself is considered nonemergent unless documentation supports an emergent status (i.e., gastric bleeding or coma/stupor).
- **Ambulance:** A patient brought in by **ambulance** does not necessarily justify an emergency room visit.

Guidelines for Use of Air Ambulance Services:
Time: If time is a critical factor in the patient's recovery or survival, or duration of ground transport would be excessive and potentially detrimental, air transport may be indicated. In general, if the ground ambulance can arrive at the destination institution within 20 minutes, it is the preferred mode of transport.
Expertise: If the health care institution does not possess the expertise to provide the definitive care required to stabilize the patient (i.e., advanced life support) and the ground ambulance providers in the near vicinity cannot provide assistance providing that care, air transport may be indicated.
Coverage: If ground ambulance utilization leaves the service area without adequate ground coverage and patient outcome will be compromised by arranging other ground transport, air transport may be indicated.
Documentation: The above guidelines serve as a guide to documentation which is necessary to determine proper reimbursement and must specify the indication and justification for air transport. If guidelines are not met, or are met but not documented, the billed transportation will be reimbursed at ground ambulance rates or denied altogether.

- **Depression/anxiety**: Documentation must support the member to be an **immediate** danger to self or others.
- **Disposition:** If a member's **disposition** is one of the following, the visit would be considered emergent:
  - Requires transfer to another facility for further treatment
  - Has expired, expires en route to the hospital or in the emergency room
  - Requires extended observation or admission
- **Fevers:** Must be considered with other documented symptoms. Generally, temperatures less than 103° rectally (children) or 102° orally (adults) are not considered emergent. Ear and axillary temperatures will be considered along with additional symptoms. Reported temperatures by patients are not acceptable for determining emergent status.
- **Insect bites, stings, embedded ticks: Minor insect bites** (tick) with simple local reactions only (i.e., erythema, local edema, itching) are not considered emergent.
- **Medical emergency:** Initial treatment and/or stabilization for **medical emergencies** including indications of severe chest pain, dyspnea, gastrointestinal hemorrhage, spontaneous abortion, loss of consciousness, status epilepticus or other conditions considered "life-threatening" would be considered emergent. Just because these

Hospital – Outpatient continued

conditions may be considered "life-threatening" at times, does not automatically indicate a Level of Care III. The Level of Care assignment is dependent upon the severity of the situation and the services provided.

- **Mental disorders:** Such as depression or anxiety as an individual diagnosis is considered nonemergency unless the member is noted to be suicidal or of immediate risk to self or others.
- **Minor burns/sunburns**: Minor **burns**/sunburns are considered nonemergent unless documentation supports the presence of complications such as severe swelling, infection, or the young age of the patient. Eye and chemical burns are considered emergent.
- **Otitis media:** If tympanic membrane is bulging or ruptured, drainage from the ear(s), fever of 103 or above or is a child of age 3 or under and is crying inconsolably, a visit to the emergency room would be considered emergent for consideration of **otitis media**. If the physical examination reveals evidence of acute otitis media (after office hours or on the weekend), but does not meet any of the above criteria, the ED visit may be considered emergent because of the time of day/week.
- **Patient noncompliance:** Intentional noncompliance with previously ordered medications and treatments resulting in continued symptoms of the same condition are considered nonemergent. Refusal to comply with currently ordered procedures/treatments such as drawing blood for laboratory work will also be considered nonemergent.
- **Registered Nurse Services**: Hospitals can bill procedure code 99211 for registered nurse (RN) services and costs associated with the use of room and supplies when no other professional service is reimbursable. This includes but not limited to:
  - Wound care
  - Obstetrical check
  - Other treatments

  Code 99211 cannot be billed on the same day as codes G0463 or 31720.
- **Removal of cutaneous foreign bodies**: Removal of cutaneous foreign bodies (i.e., simple splinters, cactus needles) are considered nonemergent unless sedation or the use of extensive medical supplies such as cutdowns are required.
- **Seizures** are considered emergent when:
  - This is an initial seizure.
  - There is a secondary diagnosis noted (i.e. infection or headache).
  - The patient is 12 years old or younger.
  - The seizure is still in progress or status epilepticus.
  - This is a febrile seizure.
  - The condition is aggravated by alcohol/drug ingestion.
  - This is a previously undiagnosed condition.
- **Scheduled visits:** Scheduled visits to the emergency department for procedures, examinations, or medication administration (i.e. cast changes, suture removal, dressing changes, follow-up examinations and second opinion consultations) are considered nonemergent.
- When a member leaves the emergency department against medical advice (AMA) the service is generally considered nonemergent. However, if the facility provided

Hospital – Outpatient continued

considerable services before the patient left AMA, the visit will be given consideration as emergent.

- **Sickle cell anemia:** If a person has sickle cell anemia and presents with suspicion of an infectious or hypoxic process, or complains of pain, the visit may be considered emergent.
- **Skin rash/hives**: Documentation must support presence of systemic complications beyond the local skin discomforts resulting from the rash.
  - If the rash causes eye complications or the member has a history of anaphylactic (allergic) reactions, the visit is considered emergent.
  - If the rash causes eye edema or impairment to eye function and the visit is over a weekend when there is no access to a physician's office, the visit may be considered emergent.
  - A history of anaphylaxis along with the rash is considered emergent.
- **Trauma/injury:** Recent trauma or injury is considered emergent. Recent is defined as an injury occurring within 48 hours prior to the emergency room visit.
  - Minor abrasions/lacerations not requiring suture or other injuries not requiring treatment are not emergent.
  - If the injury is older than 48 hours and symptoms have deteriorated to the point of requiring emergency care, consider as emergent.
  - An injury that requires only simple first aid treatment that can be done in the home (such as cleansing and/or bandaging an abrasion) is not considered emergent.
  - A laceration requiring steri-strips indicates a gaping wound and would be considered emergent.
  - X-rays do not define the level of care.
- **Tetanus injection:** A tetanus injection is not considered emergent and does not change the visit to emergent. However, the patient should not have to make two visits (one to the emergency room and one to an office or public health department) to receive the tetanus injection. When needed, a tetanus injection should be given within 48-72 hours of the injury, if possible.
- **Vital signs:** If the vital signs are outside a reasonable range for the age, consider the visit as emergent (see **Fever**).

Fetal Testing

Fetal aneuploidy testing codes 81420 and 81507 will be covered for at-risk pregnancies when billed with a covered ICD-10 diagnosis code. Fetal aneuploidy testing will be limited to coverage of one *CPT* code per pregnancy (270 days).

- DNA-based noninvasive prenatal tests of fetal aneuploidy are proven and medically necessary as screening tools for trisomy 21 (Down syndrome), trisomy 18 (Edwards syndrome) or trisomy 13 (Patau syndrome) in any one of the following circumstances:
  - Maternal age of 35 years or older at delivery
  - Fetal ultrasound findings indicating an increased risk of aneuploidy
  - History of prior pregnancy with trisomy
  - Positive first or second trimester screening test results for aneuploidy

Hyperbaric Oxygen Therapy

- Parental balanced Robertsonian translocation with an increased risk of fetal trisomy 13 and 21

- DNA-based noninvasive prenatal tests of fetal aneuploidy are unproven and NOT medically necessary for all other indications including, but not limited to, the following:
  - Multiple gestation pregnancies
  - Screening for microdeletions
  - Screening for sex chromosome aneuploidies

Hyperbaric oxygen therapy is a covered service under KMAP with PA. The following criteria must be met before a PA will be approved.

1. The services must be for one of the following conditions:
   a. Acute carbon monoxide intoxication
   b. Decompression illness
   c. Gas embolism
   d. Gas gangrene
   e. Acute traumatic peripheral ischemia
   f. Compromised skin grafts
   g. Chronic refractory osteomyelitis
   h. Osteoradionecrosis
   i. Soft tissue radionecrosis
   j. Cyanide poisoning
   k. Actinomycosis
   l. Crush injuries and suturing of severed limbs
   m. Progressive necrotizing infections
   n. Acute peripheral arterial insufficiency
   o. Diabetic wounds of lower extremities
2. It must be documented that other treatments have been attempted with no improvement.

- Facilities can bill for this procedure using procedure code 99183or G0277 (one unit equals 30 minutes with a maximum of four units allowed per treatment session). The facility must choose which procedure code they will bill prior to the approval of the PA.
- If there are multiple treatment sessions on the same day, each subsequent session must be billed on a separate detail line with a 76 modifier.

Maternal Depression Screenings

Maternal Depression Screenings are reimbursable using the Current Procedural Technology (CPT) and Health Care Common Procedure Coding System (HCPCS) codes 96160, 96161, G8431, and G8510 when using one or more of the following validated screening tools:

- Edinburgh Postnatal Depression Scale (EPDS)
- Perinatal Grief Intensity Scale (PGIS)
- Postpartum Depression Screening Scale (PDSS)
- Patient Health Questionnaire 9 (PHQ-9)
- Beck Depression Inventory II (BDI-II)
- Center for Epidemiologic Studies Depression Scale (CES-D)

Maternal Depression Screenings continued

- Zung Self-Rating Depression Scale (SDS)

These screenings are reimbursable when a woman is pregnant or after a perinatal loss (stillbirth, miscarriage or neonatal death) that occurs during her Medicaid coverage period, and screenings are allowed postpartum up until the child is 12 months of age. Any screenings that occur prior to the birth of the child or after a perinatal loss, should be billed under the woman's Medicaid Identification (ID) number using CPT code 96160. Any screening that occurs after the child is born is considered an Early Periodic Screening, Diagnostic and Treatment (EPSDT) benefit per Centers for Medicare and Medicaid Services (CMS) guidance, and should be billed under the infant's Medicaid ID number, using CPT code 96161. If the child does not have an assigned Medicaid ID number, CPT code 96161 can be billed under the mother's Medicaid ID number for up to 45 days postpartum. Rural Health Care/Federally Qualified Health Centers (RHC/FQHC) may perform these screenings and list this on their claims, but it will be included in the encounter rate.

The Maternal Depression Screenings can be administered by non-licensed staff. This includes home visitors, medical assistants, and community health workers since they are supervised by licensed professionals performing the primary service. These screenings should be reviewed by licensed professionals to ensure accuracy of the scoring and any necessary follow-up.

72						

Clinical staff in obstetrics and gynecology practices should be prepared to initiate medical therapy, refer patients to appropriate behavioral health resources when indicated, or both. Evidence suggests that collaborative care models implemented in obstetrics and gynecology offices improve long-term patient outcomes.

Follow-up with these patients and clinical support and training offered to staff results in greater reduction in depression prevalence. Initiation of treatment or referral to mental health care providers offers maximum benefit.

Miscarriage, Stillbirth and Neonatal Loss; Bereavement Follow-up Recommendations:
Loss of a pregnancy or death of a newborn affects every aspect of a family's life. Every effort should be made to determine the cause of the loss, to understand the family's grief responses, and to facilitate healthy coping and adjustment. The consequences of intense grief due to perinatal

Maternal Depression Screenings continued

loss may include significant couple relationship issues, depression, anxiety, social phobia, obsessive compulsive disorder and post-traumatic stress disorder (PTSD) that may extend into the subsequent healthy pregnancies.

When the Perinatal Grief Intensity Scale (PGIS) is given shortly after the loss, it can also predict women who will continue to have intense grief 3-5 months in the future, and have higher risk for developing clinical level anxiety, depression, PTSD and couple relationship issues.

It is recommended that healthcare providers routinely screen for symptoms of depression and anxiety among women after a perinatal loss, as well as subsequent pregnancies.

Studies have shown that women who had experienced a stillbirth are twice as likely to have a high depression score compared to women who had a live birth and that women with a history of depression are especially vulnerable to persistent depression after a stillbirth, even after the subsequent birth of a healthy child. One study was the first to show that women who have no history of depression may face a risk for depression many months after a stillbirth.

Depression after a miscarriage is usually most severe immediately after a pregnancy is lost and that the depression rates dropped over the course of the year.

One of the key recommendations is that every woman who has experienced a miscarriage, stillbirth or neonatal death should receive follow-up care.

Referral and Follow-up Process on Positive Screenings Recommended by the American Academy of Pediatrics (AAP):

Immediate action is necessary if:

- Possible suicidality indicated in screening tool
- Mother expresses concern about her or her infant's safety
- Provider suspects that the mother is suicidal, homicidal, severely depressed, manic or psychotic When a depression screen is positive, management varies according to the degree of concern and need.

Management of Postpartum Depression includes:

- Demystification (reducing guilt and shame by emphasizing how common these feelings are);
- Support resources (family and community); and
- Referrals for the mother (to a mental health professional or the mother's PCP or obstetrician), for the mother-infant dyad, for the child (for targeted promotion of social-emotional development and early intervention, and for the mother who is breastfeeding (for lactation support from an experienced provider).

Training Opportunities:

Optional training will be offered to screeners, including medical providers and their clinical staff, to increase timely detection of maternal depression.

Maternal Depression Screenings continued

The Mental Health Integration Toolkit on the KDHE website, will be updated by Public Health and will provide guidance on screening practices and patient and provider resources. There is also a national program, Mental Health First Aid, that teaches the skills to respond to the signs of mental illness and substance use.

MRI – Breast

- MRI of the breast will be covered with the following indications:
  - Staging and therapy planning in patients diagnosed with breast cancer
  - Occult primary breast cancer when there are positive axillary nodes and no known primary tumor
  - Inconclusive diagnosis after a standard mammography evaluation, for example when scar tissue from previous surgery, dense breast tissue of breast implants can render mammographic images inconclusive
- **MRI used for screening for breast cancer is not justified.**

MRI – Head or Brain

- MRI scan of the head or brain is medically necessary if the diagnosis indicates intracranial injury, intracranial mass/tumor, CNS malignancies, cerebrovascular disorder, cerebral malformations, disorders of the cerebral hemispheres and higher brain functions, demyelinating diseases, extrapyramidal and cerebellar disorders, brain abscesses, encephalitis, tuberculous meningitis, or the presence of a neurological deficit.
- MRI scan of the head or brain may also be medically necessary with the indication of headache, seizure disorders, syncope, dizziness, or non-CNS malignancies. Inclusion of the following information will assist in adjudication of your claim:
  - **Headache:** Indicate length of chronicity and any accompanying neurologic symptoms.
  - **Seizure:** Specify if initial or repeat scan, and if seizures (or convulsions) are of disorders of recent onset, frequency of their occurrence, and any accompanying neurologic symptoms.
  - **Syncope:** Specify if recurrent or single episode and any accompanying neurologic symptoms.
  - **Dizziness:** Specify if recurrent or single episode and any accompanying neurologic symptoms.
  - **Non-CNS malignancies:** Indicate any accompanying neurologic symptoms.
- It may be necessary to contact the ordering physician for medical necessity information.

Observation Room

- Observation in the outpatient setting is a service which requires monitoring the member's condition beyond the usual amount of time in an outpatient setting. Examples of the appropriate use of the observation room include:
  - Monitoring head trauma
  - Drug overdose
  - Cardiac arrhythmias
  - False labor
- The observation room stay must be medically necessary.

Observation Room continued

- Currently, the observation stay is limited to 48 hours. A physician must have personal contact with the member at least once during the observation stay. A registered nurse or an employee under his or her direct supervision must monitor members in the observation unit. A member can be in the observation unit no more than 48 hours. Observation hours in excess of 48 hours are not reimbursable. Ancillary charges (such as lab work or x-rays) can also be billed separately. Medical supplies and injections (99070 and J7030-J7121) are considered content of service of the observation room service.
- Observation services are considered content to any surgical procedure for which global surgery rules apply when performed by the same provider during the global surgery period. Observation services are considered content of service of respiratory services (94010-94700), when performed on the same date of service by the same provider unless the observation is a significantly, separately identifiable service.
- Observation room should **not** be billed for the following:
    - Recovery room services following inpatient or outpatient surgery
    - Recovery/observation following scheduled diagnostic tests, such as arteriograms or cardiac catheterization
    - ER physician fee

  Note: **Additional information may be added to the face of your claim if applicable. Electronic billers who have had initial billings denied with EOB 548 (Service denied. This claim and all attachments have been reviewed by the medical staff and the medical necessity of the service rendered is not supported by the documentation provided. Refer to the provider manual section 8200 for further discussion.), may resubmit a paper claim with the applicable documentation noted on the face of the claim.**
- If the claim and/or attachments do not support the medical necessity of the service rendered, the service will be denied.

Sonograms – Non-Obstetrical Pelvic

- Non-obstetrical pelvic sonograms are determined medically necessary if the diagnosis indicates pelvic mass or pain, ovarian cyst, pelvic inflammatory disease, endometriosis, possible retained products of conception, or question/history of metastatic disease.
- Non-obstetrical pelvic sonograms may be medically necessary if there is an indication of vaginal bleeding or irregular menstrual cycles. It may be necessary to contact the ordering physician for medical necessity information.

Sonograms – Obstetrical Pelvic

- Obstetrical (OB) sonograms are not covered when performed solely to determine the fetal sex or to provide parents a view and/or photograph of the fetus. Only one routine OB sonogram per pregnancy is allowed. Medical necessity for more than one OB sonogram per pregnancy needs to be demonstrated with medical documentation available for review to support this necessity.
- A primary or secondary diagnosis must support medical necessity for an OB sonogram. ***Note:*** If applicable, this information should be submitted with the claim.

Sonograms – Obstetrical Pelvic continued

- The following OB sonogram procedures must be billed using a primary or secondary diagnosis code indicating this was an obstetrical procedure.

76801	76802	76805	76810	76811	76812	76813
76814	76815	76816	76817	76818	76819	76820
76821	76825	76826	76827	76828		

Upper Gastrointestinal Series

- Upper Gastrointestinal (UGI) series are medically necessary if the primary diagnosis indicates persistent dysphagia; melena; symptoms of UGI tract bleeding; or signs and symptoms of ulcers affecting the UGI tract after a trial of medicinal therapy has failed to relieve the symptoms. State guidelines allow one UGI series per day, per member, regardless of provider.
- UGI series may also be medically necessary when diagnoses such as abdominal pain and dyspepsia are used. When these common nonspecific diagnosis codes are used, additional symptoms and/or circumstances that relate to the medical necessity of the procedure must be indicated. Examples of additional information which will assist in adjudication of your claim are as follows:
    - Is the symptom persistent? If so, how long has the symptom persisted?
    - Is the symptom recurrent? When was the last episode?
    - Has the symptom or condition increased in severity?
    - Was medicinal therapy initiated prior to any procedure being performed? If so, indicate the date each therapy was initiated, name(s) of medication (list all GI related medications tried) and the length of time each medication was tried. What was the patient's response to each treatment?
    - If a chronic condition, has there been a change in symptoms? If so, describe the change(s).
    - If cancer diagnosis codes are used, what symptoms are present that indicate UGI involvement?
- Claims for UGI X-rays are denied reimbursement when the diagnosis code on the claim is either too nonspecific or is the result, rather than the reason, for the procedure. Whenever possible, use the symptoms that most clearly describe the reason for the test. It may be necessary to contact the ordering physician for medical necessity information.

X-ray – Chest

- Chest X-rays are covered if medical necessity is met.
- Preoperative and routine admission chest X-rays are not covered unless documentation of medical necessity (one or more of the following factors) is noted on the claim:
    - Sixty years of age or older
    - Pre-existing or suspected cardiopulmonary disease
    - Smoker over age forty
    - Acute medical/surgical conditions such as malignancy or trauma
- Claims denied because other factors are listed will be reconsidered if appealed (refer to **Section 5300** of the *General Billing Fee-for-Service Provider Manual*).
- It may be necessary to contact the ordering physician for medical necessity information.

8200. MEDICAL ASSESSMENT Updated 08/17

X-ray – Skull

- Skull X-rays are medically necessary if diagnosis indicates cranial trauma, primary or metastatic tumors of the skull, or tumors of the pituitary gland.
- A skull X-ray may also be medically necessary for indication of chronic sinusitis, trigeminal neuralgia, or anomalies relating to the head. Inclusion of the following documentation will assist in the adjudication of your claim:
    - **Chronic sinusitis:** Indicate any pertinent specific suspected complications resulting from chronicity.
    - **Trigeminal neuralgia:** Specify type of lesion suspected.
    - **Anomalies relating to the head:** Specify if done as a scout film for non-cosmetic reconstructive surgery. Indicate type of surgery under consideration.
- It may be necessary to contact the ordering physician for medical necessity information.

BENEFITS AND LIMITATIONS

8300. BENEFIT PLANS Updated 12/22

KMAP members will be assigned to one or more benefit plans. These benefit plans entitle the member to certain services. If there are questions about service coverage for a given benefit plan, refer to **Section 2000** of the *General Benefits Fee-for-Service Provider Manual* for information on eligibility verification.

For example, all policies and coverages under the current Medicaid program apply to the MediKan benefit plan except:

- Procedure codes for drugs and biologics deemed a Physician Administered Drug (PAD) will not be covered.
- Inpatient general hospital services are covered for MediKan members for the following conditions only:
    - Acute **psychotic** episodes
    - Substance abuse acute detoxification
    - Burns
    - Traumatic injury
    - Tuberculosis (TB)

- MS-DRGs for covered inpatient hospital services are:
  183 184 185 483 885 913 914 927 928 929 933 934 955
  956 957 958 959 963 964 965

- Additional MS-DRGs are covered when the hospital admission is related to TB and a TB diagnosis is billed on the claim.
  094 095 096

- Claims for MediKan members that group to any other MS-DRG will be reviewed. Coverage determination is based on the nature of the injury indicated by the diagnosis on the claim and by the medical documentation submitted. At a minimum, the history and physical accompanied by an admission note and the discharge summary must be submitted as part of the medical documentation. If this documentation is not submitted, the claim will be denied. Additional information may be submitted if the hospital considers it beneficial to support coverage of the DRG.

  Note: **Traumatic injury definition:** Physical harm to a person's body by an outside force that requires immediate hospitalization and medical interventions for the preservation of life and function.

Psychiatric Admission

Fee-for-service inpatient psychiatric admission claims no longer require a psychiatric preadmission assessment but are subject to a potential postpay review by the fee-for-service inpatient utilization review contractor. Coverage determinations are based on the emergent nature of the service.

8400. MEDICAID – INPATIENT/OUTPATIENT Updated 03/18

Change of Ownership

- Each hospital must notify Provider Enrollment in writing at least 60 days prior to the change of ownership closing transaction date. Failure to do so may result in:
    - The forfeiture of rights to payment for covered services provided to members by the previous owner or owners in the 60-day period prior to the date of the change of ownership.
    - The new owner or owners assuming responsibility for any overpayment made to previous owner(s) before the effective date of the change of ownership. (This shall not release the previous owner of responsibility for such overpayment).
- The new owner (and affiliated providers) must apply for a Medicaid provider number by contacting Provider Enrollment at:

  Provider Enrollment
  P.O. Box 3571
  Topeka, KS 66601-3571
- The new owner will receive the full reimbursement for any patients admitted before and discharged after the change of ownership effective date. The old owner shall not receive Medicaid payment for these services.

Advance Directives

Hospital providers participating in KMAP must comply with federal legislation (OBRA 1990, Sections 4206 and 4751) concerning advance directives. An advance directive is otherwise known as a living will or durable power of attorney. Every hospital provider must maintain written policies, procedures, and materials about advance directives.

Specific Requirements

- Each hospital must provide written information to every adult individual receiving medical care by or through the hospital. This information must contain:
    - The individual's right to make decisions concerning his or her own medical care
    - The individual's right to accept or refuse medical or surgical treatment
    - The individual's right to make advanced directives
    - KDADS "Description of the Law of Kansas Concerning Advance Directives" ***Note:*** KDADS does not provide copies of the description to providers. It is up to providers to reproduce the description. Providers are free to supplement this description so long as they do not misstate Kansas law.
- Additionally, each hospital must provide written information to every adult individual about the hospital's policy on implementing these rights.
- A hospital must document in every individual's medical record whether the individual has executed an advance directive.
- A hospital may not place any conditions on health care or otherwise discriminate against an individual based upon whether that individual has executed an advance directive.
- Each hospital must comply with state law about advance directives.

Advance Directives continued

- Each hospital must provide for educating staff and the community about advance directives. This may be accomplished by brochures, newsletters, articles in the local newspapers, local news reports or commercials.
- Each hospital must provide for educating staff and the community about advance directives. This may be accomplished by brochures, newsletters, articles in the local newspapers, local news reports or commercials.

Incapacitated Individuals

- An individual may be admitted to a facility in a comatose or otherwise incapacitated state and be unable to receive information or articulate whether he or she has executed an advance directive. If this is the case, families of, surrogates for, other concerned persons of the incapacitated individual must be given the information about advance directives. If the incapacitated individual is restored to capacity, the hospital must provide the information about advance directives directly to him or her even though the family, surrogate or other concerned person received the information initially.
- If an individual is incapacitated, otherwise unable to receive information or articulate whether he or she has executed an advance directive, the hospital must note this in the medical record.

Mandatory Compliance with the Terms of the Advanced Directive

When a patient, relative, surrogate or other concerned/related person presents a copy of the individual's advance directive to the hospital, the facility must comply with the terms of the advance directive to the extent allowed under state law. This includes recognizing powers of attorney.

Description of the Law of Kansas Concerning Advance Directives

There are two types of "advance directives" in Kansas. One is commonly called a "living will" and the second is called a "durable power of attorney for health care decisions."

The Kansas Natural Death Act, K.S.A. 65-28,106, et seq.

This law provides that adult persons have the fundamental right to control decisions relating to their own medical care. This right to control medical care includes the right to withhold life-sustaining treatment in case of a terminal condition.

Any adult may take a declaration which would direct the withholding of life-sustaining treatment in case of a terminal condition. Some people call this declaration a "living will." The declaration must be:

1. In writing
2. Signed by the adult making the declaration
3. Dated; and
4. Signed in front of two adult witnesses, or notarized.

There are specific rules set out in the law about the signature in case of an adult who can't write. There are specific rules about the adult witnesses. Relatives by blood or marriage,

Advance Directives continued

heirs, or people who are responsible for paying for the medical care may not serve as witnesses. A woman who is pregnant may not make a declaration.
The declaration may be revoked in three ways:

1. By destroying the declaration;
2. By signing and dating a written revocation; and
3. By speaking an intent to revoke in front of an adult witness. The witness must sign and date a written statement that the declaration was revoked.

Before the declaration becomes effective, two physicians must examine the patient and diagnose that the patient has a terminal condition.

The desires of a patient shall at all times supersede the declaration. If a patient is incompetent, the declaration will be presumed to be valid.

The Kansas Natural Death Act imposes duties on physicians and provides penalties for violations of the laws about declarations.

The Kansas Durable Power of Attorney for Health Care Decisions Law, K.S.A. 58-625, et seq.

A "durable power of attorney for health care decisions" is a written document in which an adult gives another adult (called an "agent") the right to make health care decisions. The power of attorney applies to health care decisions even when the adult is not in a terminal condition. The adult may give the agent the power to:

1. Consent or to refuse consent to medical treatment;
2. Make decisions about donating organs, autopsies, and disposition of the body;
3. Make arrangements for hospital, nursing home, or hospice care;
4. Hire or fire physicians and other health care professionals; or
5. Sign releases and receive any information about the adult.

A "durable power of attorney for health care decisions" may give the agent all those five powers or may choose only some of the powers. The power of attorney may **NOT** give the agent the power to revoke the adult's declaration under the Kansas Natural Death Act ("living will"). The power of attorney only takes effect when the adult is disabled unless the adult specifies that the power of attorney should take effect earlier.

The adult may **NOT** make a health care provider treating the adult the agent except in limited circumstances.

The power of attorney may be made by two methods:

1. In writing – Signed by the adult making the declaration;
2. Dated – Signed in front of two adult witnesses or written and notarized.

Relatives by blood or marriage, heirs, or people who are responsible for paying for the medical care may **NOT** serve as witnesses. The adult, at the time the power of attorney is written, should specify how the power of attorney may be revoked.

Advance Directives continued

The Patient Self-Determination Act, Section 1902(w) of the Social Security Act

This federal law, codified at 42 U.S.C. Sec. 1396a(w), was effective December 1, 1991. It applies to all Medicaid and Medicare hospitals, nursing facilities, home health agencies, hospices, and prepaid health care organizations. It requires these organizations to take certain actions about a patient's right to decide about health care and to make advance directives.

This law also required that each state develop a written description of the state law about advance directives. This description was written by the Health Care Policy section of KDADS to comply with that requirement. If you have any questions about your rights to decide about health care and to make advance directives, please consult with your physician or attorney, Third Edition: January 14, 2003

Abortions

- Non-spontaneous abortions are covered only under the following conditions:
  - In the case where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself
  - If the pregnancy is the result of an act of rape or incest
- The physician must complete the **Abortion Necessity** form to certify that the woman's physical health is in danger or that the pregnancy is a result of rape or incest. The form, located on the Forms page of the public and secure websites, may be photocopied for your use. All blanks **must** be completed, including the patient's complete address.
- Claims submitted for abortions due to rape or incest must be accompanied by a statement signed by the physician stating that he or she was informed by the member that the pregnancy was the result of rape or incest. No further documentation is required to process the claim. However, all pertinent information must be retained with the medical record.

Add-On Codes

In accordance with National Correct Coding Initiative guidelines, procedure codes identified as add-on codes must be billed in addition to the primary procedure with which they are associated. An add-on code does not stand alone since it describes work in addition to the primary procedure. For more information on billing add-on codes, refer to **Appendix D** of the *CPT* codebook.

Bariatric Surgery

Open or laparoscopic Roux-en-Y bypass (RYGB), open or laparoscopic biliopancreatic diversion (BPD), with or without duodenal switch (DS), or laparoscopic adjustable silicone gastric banding (LASGB) will be considered medically necessary when the selection criteria below are met:

1. Must meet either a (adults) or b (adolescents):
   a. For adults aged 18 years or older, presence of severe obesity that has persisted for at least the last 2 years (24 months), documented in contemporaneous clinical records, defined as any one of the following:
      i. Body mass index (BMI) exceeding 40

Bariatric Surgery continued

ii. BMI greater than 35 in conjunction with either of the following severe comorbidities:
1. Clinically significant obstructive sleep apnea
2. Coronary heart disease
3. Medically refractory hypertension (blood pressure greater than 140 mmHg systolic and/or 90 mmHg diastolic despite concurrent use of 3 anti-hypertensive agents of different classes)
4. Type 2 diabetes mellitus

b. For adolescents who have completed bone growth (generally age of 13 in girls and age of 15 in boys), presence of obesity with severe comorbidities:
i. BMI exceeding 40 with one or more of the following serious comorbidities:
1. Clinically significant obstructive sleep apnea
2. Type 2 diabetes mellitus
3. Pseudotumor comorbidities
ii. BMI exceeding 50 with one or more of the following less serious comorbidities:
1. Medically refractory hypertension (blood pressure greater than 140 mmHg systolic and/or 90 mmHg diastolic despite concurrent use of 3 anti-hypertensive agents of different classes)
2. Dyslipidemias
3. Nonalcoholic steatohepatitis
4. Venous stasis disease
5. Significant impairment in activities of daily living
6. Intertriginous soft-tissue infections
7. Stress urinary incontinence
8. Gastroesophageal reflux disease
9. Weight-related arthropathies that impair physical activity
10. Obesity-related psychosocial distress

Note: Provisional coverage of LASGB for members younger than 18 years of age is a covered service. These individuals may receive other bariatric procedures, but LASGB will only be approved on a case-by-case basis. The member must meet medical necessity criteria. The provider must submit documentation regarding the risk versus the benefit for individuals younger than 18 years of age. Procedure codes 43770, 43771, 43772, 43773, and 43774 are provisionally covered.

2. Member has attempted weight loss in the past without successful long-term weight reduction
3. Member must meet either the following Criterion a (physician-supervised nutrition and exercise program) **OR** Criterion b (multi-disciplinary surgical preparatory regimen):
a. **Physician-supervised nutrition and exercise program:** Member has participated in physician-supervised nutrition and exercise program (including dietician consultation, low-calorie diet, increased physical activity, and behavioral modification), documented in the medical record at each visit. This physician-supervised nutrition and exercise program must meet **ALL** the following criteria:
i. Member's participation in a physician-supervised nutrition and exercise program must be documented in the medical record by an attending physician who

Bariatric Surgery continued

supervised the member's participation. The nutrition and exercise program may be administered as part of the surgical preparative regimen, and participation in the nutrition and exercise program may be supervised by the surgeon who will perform the surgery or by some other physician.

Note: A physician's summary letter is not sufficient documentation.

ii. Documentation should include medical records of physician's contemporaneous assessment of patient's progress throughout the course of the nutrition and exercise program. For members who participate in a physician-administered nutrition and exercise program, program records documenting the member's participation and progress may NOT substitute for physician medical records.

iii. Nutrition and exercise program must be supervised and monitored by a physician working in cooperation with dieticians and/or nutritionists, with a substantial face-to-face component (must not be entirely remote).

iv. Nutrition and exercise program(s) must be for a cumulative total of 6 months (180 days) or longer in duration and occur within 2 years prior to surgery, with participation in one program of at least 3 consecutive months. (Precertification may be made prior to completion of nutrition and exercise program as long as a cumulative of 6 months participation in nutrition and exercise program[s] will be completed prior to the date of surgery).

b. **Multi-disciplinary surgical preparatory regimen:** Proximate to the time of surgery (within 6 months prior to surgery), member must participate in organized multidisciplinary surgical preparatory regimen of at least 3 months (90 days) duration meeting **ALL** the following criteria, to improve surgical outcomes, reduce the potential for surgical complications, and establish the member's ability to comply with postoperative medical care and dietary restrictions:

i. Behavior modification program supervised by qualified professional

ii. Consultation with a dietician or nutritionist

iii. Documentation in the medical record of the member's participation in the multidisciplinary surgical preparatory regimen at each visit.
Note: A physician's summary letter, without evidence of contemporaneous oversight, is not sufficient documentation. Documentation should include medical records of the physician's initial assessment of the member, and the physician's assessment of the member's progress at the completion of the multidisciplinary surgical preparatory regimen.

iv. Exercise regimen (unless contraindicated) to improve pulmonary reserve prior to surgery, supervised by exercise therapist or another qualified professional

v. A substantial face-to-face component (must not be entirely delivered remotely)

vi. Reduced-calorie diet program supervised by dietician or nutritionist

4. For members who have a history of severe psychiatric disturbance (schizophrenia, borderline personality disorder, suicidal ideation, severe depression) or who are currently under the care of a psychologist/psychiatrist or who are on psychotropic medications, preoperative psychological clearance is necessary to exclude members who are unable to provide informed consent or who are unable to comply with the pre- and post-operative regimen.

Bariatric Surgery continued

Note: The presence of depression due to obesity is not normally considered a contraindication to obesity surgery.

Bariatric Surgery – Repeat Bariatric Surgery

- Repeat bariatric surgery is considered medically necessary to correct complications from bariatric surgery, such as obstruction, stricture, erosion, or band slippage.
- Repeat bariatric surgery is considered medically necessary for members whose initial bariatric surgery was medically necessary (i.e., who met medical necessity criteria for their initial bariatric surgery) and who meet any one of the following medical necessity criteria:
    - Conversion to a RYGB or BPD/DS may be considered medically necessary for members who have not had adequate success (defined as loss of more than 50% of excess body weight) 2 years following the primary bariatric surgery procedure and the member has been compliant with a prescribed nutrition and exercise program following the procedure.
    - Revision of a primary bariatric surgery procedure that has failed due to dilation of the gastric pouch or dilation of the gastrojejunostomy anastomosis is considered medically necessary if the primary procedure was successful in inducing weight loss prior to the dilation of the pouch or GJ anastomosis, and the member has been compliant with a prescribed nutrition and exercise program following the procedure.
    - Replacement of an adjustable band due to complications (e.g., port leakage, slippage) that cannot be corrected with band manipulation or adjustments.

Experimental and Investigational Bariatric Surgical Procedures

Each of the following procedures is considered experimental and investigational because the peer reviewed medical literature shows them to be either unsafe or inadequately researched. These are not covered services.

- Bariatric surgery as a treatment for idiopathic intracranial hypertension
- Gastroplasty, more commonly known as “stomach stapling” (see below for clarification from vertical band gastroplasty)
- Intragastric balloon
- Laparoscopic gastric plication
- LASGB, RYGB, and BPD/DS procedures not meeting the preceding medical necessity criteria
- Loop gastric bypass
- Mini gastric bypass
- Roux-en-Y gastric bypass as a treatment for gastroesophageal reflux in non-obese persons
- Silastic ring vertical gastric bypass (Fobi pouch)
- Transoral endoscopic surgery (e.g., the StomaphyX device/procedure)
- Vertical banded gastroplasty (VBG)

Note: Bariatric surgery is not covered as a treatment for infertility.

Cholecystectomy

As a high incidence of gallbladder disease (28%) has been documented after surgery for morbid obesity, routine cholecystectomy is considered medically necessary when performed in concert with elective bariatric procedures.

Covered Services

Sleep studies and polysomnography (PSG) are covered services included in the preoperative process for bariatric surgery candidates. The member must meet criteria to be considered a candidate for bariatric surgery, which includes a six-month weight loss plan supervised by a physician. Prior authorization is required.

One of the following procedure codes can be billed preoperatively when other criteria are met for bariatric surgery: 95807, 95808, 95810, and 95811.

An open or laparoscopic sleeve gastrectomy (43775) is a covered service and considered medically necessary when the selection criteria documented in the original bariatric policy are met.

Kansas Medicaid will follow the lead of CMS by eliminating the certification requirement for facilities that provide bariatric procedures.

Bone Anchored Hearing Aid

- A bone anchored hearing aid (BAHA) is covered by KMAP with the following specifications and limitations. A BAHA is limited to one every four years, with one replacement. PA is required for all BAHA services. All providers must obtain a PA prior to providing service.

  Note: When a bone anchored hearing aid procedure is done in two stages, the charge for the procedure should only be billed once. If it is billed once for each stage, the second charge will be denied.

- Bone anchored hearing aid procedure codes are as follows:

  69710 69711 69714 69716 69719 69726 69727 69728 69729
  L8690 L8691

- A BAHA is covered with PA for a KAN Be Healthy – Early and Periodic Screening, Diagnostic, and Treatment (KBH-EPSDT) member who meets all the following criteria:
  - **Each of items one, two, three, and four**
    1. The member must be five years of age or older.
    2. Standard hearing aids cannot be used due to a medical condition.
    3. The member must have good manual dexterity or have assistance to snap the device onto the abutment.
    4. The member is able to maintain proper hygiene at the site of the fixture.
  - **Either items five or six**
    5. Tumors of the external canal and/or tympanic cavity are present.
    6. Congenital or surgically induced malformations (e.g. atresia) of the external ear canal or middle ear are present.
  - **At least one of items seven, eight, or nine**
    7. There is **unilateral conductive or mixed hearing loss**.

Bone Anchored Hearing Aid continued

- Unilateral conductive or mixed hearing loss caused by congenital malformations of the external or middle ear. Conventional hearing aids cannot be worn. Member must have:
  - Average bone conduction threshold better (less) than 45 dB (at 500, 1000, 2000, 3000 Hz) in the indicated ear
  - A Speech discrimination score greater than 60% in the indicated ear

8. There is **bilateral conductive hearing loss**.
   - Conductive and mixed hearing loss involving both ears which is not able to be treated with reconstructive surgery or conventional hearing aids. Members must meet all the following:
     - Moderate (40dB) to severe (70dB) conductive hearing loss symmetrically
     - Less than 10dB difference in average bone conduction (at 500, 1000, 2000, 4000 Hz) or less than 15 dB difference in bone conduction at individual frequencies.
     - Mixed hearing loss with an average bone conduction better (less) than 45dB in either ear (at 500, 1000, 2000, 4000 Hz)
9. There is **unilateral sensorineural hearing loss (single-sided deafness)**.
   - Nerve deafness in the indicated ear making conventional hearing aids no longer useful. The implant is designed to stimulate the opposite (good ear) by bone conduction through the bones of the skill. Therefore, the audiometric criteria are for the good ear. Member must meet all the following:
     - Severe (70 dB) to profound (90dB) hearing loss on one side with poor speech discrimination and the inability to use a conventional hearing aid in that ear
     - Normal hearing in the good ear as defined by an air conduction threshold equal to or better (less) than 20 dB (at 500, 1000, 2000, 3000 Hz)

- A child younger than five years of age with unilateral congenital atresia of the ear canal or middle ear in the presence of a maximum conductive hearing loss and adequate cochlear (inner ear) function may be considered on an individual basis. Adequate cochlear function is demonstrated audiologically when stimulation through bone conduction results in significantly improved and functional hearing in the involved ear.

- For a child with congenital malformations, sufficient bone volume, and bone quality must be present for a successful fixture implantation. Alternative treatments, such as a conventional bone conduction hearing aid, should be considered for a child with a disease state that might jeopardize osseointegration.

Replacements

- One replacement BAHA is covered for a KBH-EPSDT member who meets the initial placement criteria.

Bone Anchored Hearing Aid continued

- PA is required for all BAHA replacement services. All providers must obtain a PA prior to providing service.
- A replacement processor cannot be billed at the same time as the original processor or the original surgery.
- Replacements are limited to one every four years if lost, stolen, or broken.
- A replacement is not allowed for the purpose of upgrading. A BAHA can only be replaced if the current processor has an expired warranty, is malfunctioning, and cannot be repaired.

Carve Out Drugs – Hospital Billing Guidelines

Carve Out Drugs are defined as select pharmaceuticals that are greater than or equal to one hundred thousand dollars in drug costs within a year (365 days). These drugs are excluded from reimbursement under the Diagnosis-Related Group (DRG) payment methodology and must be billed as an outpatient claim.

- Only the drugs specifically identified under the Carve Out Drug policy will be considered for separate management and reimbursement.
- Coverage under this policy applies only when the State Medicaid program is the primary payer.

Carve Out Drugs:

Effective retroactive to the dates listed below, the following pharmaceutical products are considered Carve Out Drugs.

Carve Out Drug Name	Effective Date
Abecma® (idecabtagene vicleucel)	*Retroactive to 06/30/2025*
Aucatzyl® (obecabtagene autoleucel)	*Retroactive to 06/30/2025*
Breyanzi® (lisocabtagene maraleucel)	*Retroactive to 06/30/2025*
Carvykti® (ciltacabtagene autoleucel)	*Retroactive to 06/30/2025*
Casgevy® (Exagamglogene Autotemcel)	*Retroactive to 06/30/2025*
Kebilidi™(eladocagene exuparvovec-tneq)	*Retroactive to 06/30/2025*
Kymriah® (tisagenlecleucel)	*Retroactive to 06/30/2025*
Lenmeldy® (atidarsagene autotemcel)	*Retroactive to 10/18/2024*
Lyfgenia™ (Lovotibeglogene Autotemcel)	*Retroactive to 06/30/2025*
Ryoncil® (remestemcel-l-rknd)	*Retroactive to 06/30/2025*
Skysona™ (elivaldogene autotemcel)	*Retroactive to 06/30/2025*
Tecartus® (brexucabtagene autoleucel	*Retroactive to 06/30/2025*
Yescarta® (axicabtagene ciloleucel)	*Retroactive to 06/30/2025*
Zevaskyn™ (prademagene zamikeracel)	*Retroactive to 06/30/2025*
Zynteglo™ (Betibeglogene autotemcel)	*Retroactive to 06/30/2025*

8400. MEDICAID Updated 12/25

Carve Out Drugs – Hospital Billing Guidelines continued

Billing and Reimbursement Guidance:

- Carve Out Drugs must be billed as an outpatient claim and reimbursed separately from the DRG payment. The cost of the drug must not be included in the inpatient DRG rate.
- Hospital must submit the invoice with the claim. Claims billed without a clear, readable invoice will be denied.
- White bagging (product billed through the pharmacy benefit and sent to the rendering provider/facility) of the Carve Out Drugs is not allowed.
- Exception for Same-Day Billing: Inpatient and outpatient claim edits related to same-day billing will be waived only in cases where:
    - The Carve Out Drug administration is part of an approved inpatient treatment, or
    - Complications during outpatient treatment necessitate inpatient admission.
- Duplicate Billing: Carve Out Drugs must not be billed on both inpatient and outpatient claims. If duplicate billing is identified:
    - The claim will be subject to recoupment.
    - The provider will be required to void and resubmit the claim excluding the Carve Out Drug.
- Claim Editing or Post-pay Review: Inpatient claims will be subject to claim editing and/or post-payment review. As part of this process, hospitals may be contacted to provide additional documentation, including but not limited to drug invoices, NDC (National Drug Code) information, and other supporting details.

Drug Revenue Codes:

Providers should review applicable inpatient drug revenue codes when submitting claims. Possible inpatient claim drug revenue codes to review are listed below. For the most current list of revenue codes, please refer to the Noridian Medicare website at: https://med.noridianmedicare.com/web/jea/topics/claim-submission/revenue-codes

Revenue Code	Description
025X	Pharmacy (Also see 063X, an extension of 250X)
026X	IV Therapy
0294	Supplies/Drugs for DME
063X	Pharmacy - Extension of 025X
089X	Pharmacy - Extension of 025X and 063X

Children and Family Services (CFS) Contractors

Medicaid reimbursable services will not be paid by child welfare contractors. All services for children assigned to contractors, including behavior management and mental health, must be billed directly to KMAP and will be reimbursed at the approved Medicaid rate. Prior authorization (PA) and other restrictions apply.

Drug Eluted Stents

Effective with dates of service on or after April 1, 2025, the following drug eluted stents will be covered for medical necessary when provided by Provider Type/Provider Specialty (PT/PS) 01/010 at place of services 19, 21, or 22. Prior authorization is required.

C9600	C9601	C9602
C9603	C9604	C9605
C9606	C9607	C9608

Member must also have one of the qualifying diagnoses listed below:

Gender Transition Care

Pursuant to Senate Bill 63 (SB63), Kansas Medicaid (KanCare) has implemented restrictions on the reimbursement and coverage of gender-affirming health care services, including surgical and pharmacologic (hormonal) treatments. These changes apply to Medicaid members of all ages, with specific provisions based on age group.

Coverage Restrictions for Minors (Ages 0-17):

Effective retroactive to February 25, 2025, Kansas Medicaid shall not reimburse or provide coverage for gender-affirming health care services to individuals under age 18 when such services are:

- Performed for the purpose of presenting as a member of the opposite sex, or
- Intended as treatment for a child whose perceived gender or sex is inconsistent with their biological sex assigned at birth.
- These restrictions apply to surgical procedures including, but not limited to, those listed in Section 3(a) and 3(b) of SB63, which are differentiated by biological sex.

Coverage Restrictions for Young Adults (Ages 18-20):

Effective retroactive to June 1, 2025, Kansas Medicaid shall not reimburse or provide coverage for surgical treatment related to gender-affirming care for members aged 18 through 20 when:

- The treatment is provided for the purpose of alleviating distress due to incongruence between perceived gender and biological sex.
- Such treatments are classified as experimental under Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) guidelines and are therefore not covered.

Coverage Restrictions for Adults (Ages 21 and Older):

Effective retroactive to September 1, 2025, Kansas Medicaid will not provide de novo (new) coverage for surgical or pharmacologic (hormonal) gender-affirming treatment for adults aged 21 and older when:

- The treatment is intended to support an individual's presentation as a member of the opposite sex, and
- The individual's gender identity is incongruent with their biological sex assigned at birth.

Exceptions (for adults only):

- Members who have already initiated surgical or hormonal gender-affirming treatment prior to the specified effective dates above, will be evaluated and managed on a case-by-case basis.
- Medically necessary psychological or behavioral health services remain covered.

8400. MEDICAID Updated 10/25

Gender Transition Care continued

Claims Processing for All Age Groups:

Claims billed with any of the following ICD-10-CM diagnosis codes in any diagnosis position will suspend for manual review:

ICD-10 Diagnosis Codes
F64.0
F64.1
F64.2
F64.8
F64.9
Z87.890

Providers must submit supporting documentation (e.g., medical records, clinical notes) for review. Contested denials require full documentation to assess medical necessity or eligibility under allowable exceptions (see below).

Exceptions to Coverage (Ages 0-20):

Under SB63 and KMAP policy, exceptions may apply in the following circumstances:

- Treatment of individuals with a medically verifiable disorder of sex development, including:
  - Ambiguous biological sex characteristics (e.g., 46 XX with virilization, 46 XY with under-virilization).
  - Diagnoses confirmed by genetic or biochemical testing showing atypical sex chromosome structure or hormone production.
- Treatment of infection, injury, disease, or disorder caused or exacerbated by a previously performed prohibited procedure.

Providers are encouraged to review SB63 in full and adjust treatment and billing practices accordingly. Please contact your Managed Care Organization (MCO) or the Kansas Medicaid Provider Assistance line with questions regarding claim processing or medical necessity documentation.

8400. MEDICAID Updated 08/17

Immunization Administration

- Providers must bill the appropriate administration code in addition to the vaccine/toxoid code for each dose administered. Reimbursements of CPT codes for vaccines covered under the Vaccine for Children (VFC) program will not be allowed for children 18 years of age and younger.
- PACS software requires a charge on each line item being submitted. Providers who bill electronically through the PACS system will need to indicate a charge of $.01 on the line for the vaccine/toxoid code. MMIS will deny the service even though a charge was submitted.

Administration Codes

90460 90471 90472 90473 90474 0001A 0002A 0011A 0012A

- All vaccines recommended by the Advisory Committee on Immunization Practices (ACIP) are covered.

Intrathecal Baclofen

- Intrathecal baclofen pumps are covered for Medicaid members. This includes the initial and all subsequent implantation(s), revision(s), repairs, catheters, batteries, refills, removals, and maintenance of the intrathecal baclofen pumps when indicated. Three services require PA: 62350, 62351, and 62362. The following conditions must be met:
    - The member must have responded favorably to a trial of intrathecal baclofen and documentation of previously used medication.
    - The member's ICD diagnosis code must be a covered code and the source of the spasticity must be documented.
    - The member must be over the age of four years or there must be documentation that there is sufficient space within the child's chest wall for the pump to be implanted.
    - Contraindications include pregnancy and active infection at time of surgery.

- The following procedure codes do not require PA:

62322 62323 62326 62327 62355 62365 62368 62369 62370 95990 95991

8400. MEDICAID Updated 08/17

Screening, Brief Intervention, and Referral for Treatment

Screening, Brief Intervention, and Referral for Treatment (SBIRT) is an evidence-based approach for identifying patients who use alcohol and other substances at increased levels of risk, with the goal of reducing and preventing related health consequences, diseases, accidents, and injuries. SBIRT is designed to identify an individual who has an alcohol and/or other substance use disorder or is at risk for developing one by evaluating responses to questions about alcohol and/or other substance use.

- Practitioners providing SBIRT services to Medicaid-eligible patients in Kansas must meet the applicable KDADS requirements including the following:
  - Currently licensed and in good standing as an approved professional type
  - Submission of an attestation (facility) or certificate (individual) as proof of completion of an approved SBIRT training
- Services to patients must be provided in an approved service location.
- The following services are covered for this program:
  H0049 H0050 99408 99409
- Reference the *Substance Use Disorder Provider Manual* on the Provider Manuals page of the KMAP website for additional information on practitioner, facility, code, billing, and documentation requirements.
- More information on SBIRT can be found on the SBIRT page of the SAMHSA website or the Policies and Regulations page of the KDADS website.

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services

Description of the Procedure, Product, or Service: Sleep medicine services include procedures to evaluate adult and pediatric patients for a variety of sleep disorders. Sleep medicine testing services are diagnostic procedures using in-laboratory and portable technology to assess physiologic data and therapy. All sleep services include recording, interpretation, and report.

Effective with dates of service on and after July 1, 2024, Medicaid will cover sleep studies as medically necessary for both adult and pediatric members.

Attended Sleep Studies:

Attended sleep studies or nocturnal polysomnography (PSG) are indicated to assess the following sleep related disorders:

- Sleep related breathing disorders (obstructive sleep apnea and central sleep apnea).
- Narcolepsy and idiopathic hypersomnia.
- Parasomnias and seizure disorders.
- Periodic limb movement disorder.

Polysomnography requires a minimum of the following channels: Electroencephalogram (EEG), Electrooculogram (EOG), chin Electromyogram (EMG), air-flow, oxygen saturation, respiratory effort and heart rate, and are attended by a technologist (Kapur, 2017). They are used for initial, repeat diagnosis as well as follow-up of therapeutic interventions for these conditions in adult pediatric patients.

Unattended Sleep Studies (Home Sleep Test [HST]):

Unattended (home) sleep studies are considered medically necessary for patients with symptoms suggestive of obstructive sleep apnea (OSA) when the home sleep study is part of a comprehensive sleep evaluation using a Type II, Type III, or Type IV device measuring airflow. Home sleep tests are considered inappropriate for testing people with co-morbid conditions, people suspected of having sleep disorders other than obstructive sleep apnea (OSA), and those not at high risk for moderate to severe OSA. However, there may be some situations in which home sleep tests may require follow-up with an attended test when the home test is negative, or other factors contribute to a technical failure. (See separate clinical guideline for "Sleep Study, Unattended" when that procedure requires authorization.)

Types/Levels:

Sleep studies refer to the continuous and simultaneous recording of various physiological parameters of sleep followed by physician review and interpretation, performed in the diagnosis and management of sleep disorders. Sleep studies have been classified based on the number and type of physiological variables recorded and whether or not the study is attended by a technologist or performed with portable equipment in the home or some other unattended setting.

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Types/Levels continued:

The types of sleep studies are as follows:

Type (Level)	Description
I	Standard polysomnography (PSG) with a minimum of 7 parameters measured, including EEG, EOG, chin EMG, and ECG, as well as monitors for airflow, respiratory effort, and oxygen saturation. A sleep technician is in constant attendance.
II	Comprehen sive portable PSG studies that measure the same channels as type I testing, except that a heart rate monitor can replace the ECG and a sleep technician is not necessarily in attendance.
III	Monitor and record a minimum of 4 channels and must record ventilation (at least two channels of respiratory movement, or respiratory movement and airflow), heart rate or ECG, and oxygen saturation. A sleep technician is not necessarily in constant attendance but is needed for preparation.
IV	Three or more channels, one of which is airflow. Other measurements include oximetry and at least 2 other parameters (e.g., body position, EOG, peripheral arterial tonometry (PAT) snoring, actigraphy, airflow). A sleep technician is not necessarily in attendance but is needed for preparation.

Indication for Sleep Study Attended for Adults:

Suspected sleep-related breathing disorders with a high pre-test probability of moderate to severe obstructive sleep apnea.

Signs and symptoms including:

- Excessive daytime sleepiness; and
- Any two of the following:
  - Habitual loud snoring,
  - Witnessed apneas or gasping and chocking,
  - Diagnosed hypertension,
  - BMI > 30 or large neck circumference (>17 inches in men, >16 inches in women);
- There is a contraindication for an unattended sleep study (see below)

OR

- A member of a high-risk population, including:
  - Congestive heart failure
  - Atrial fibrillation
  - Chronic kidney disease
  - Treatment of refractory hypertension
  - Type 2 diabetes

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Indication for Sleep Study Attended for Adults continued:

- Nocturnal dysrhythmias
- Stroke
- Pulmonary hypertension
- High-risk driving populations
- Obesity (BMI >35)
- Preoperative for bariatric surgery
- Craniofacial or upper airway soft tissue abnormalities, including:
  - Adenotonsillar enlargement
  - Modified Mallampati score of 3 or 4
  - Retrognathia
  - Lateral peritonsillar narrowing
  - Elongated/enlarged uvula
  - High arched/narrow hard palate
  - Nasal abnormalities (Nasal abnormalities (polyps, deviation, valve abnormalities, turbinate hypertrophy)

- **AND** any **TWO** of the following:
  - Excessive daytime sleepiness (with Epworth Sleepiness Scale (ESS) score > 10).
  - Habitual loud snoring.
  - Witnessed apneas or gasping and choking
- **AND** there is a contraindication for unattended sleep study.
- With documented clinical concern for central sleep (CSA) based on:
  - Sleep symptoms (e.g., fragmented sleep, insomnia, apneas, daytime sleepiness); AND
  - Comorbid medical conditions (e.g., heart failure, opioid use, neurological disorders)

Suspected narcolepsy/idiopathic hypersomnia (Kapur, 2017):

- A multiple sleep latency test (MSLT) is indicated in the evaluation of hypersomnia including narcolepsy and idiopathic hypersomnia (Aurora, 2012; Littner, 2005)
- PSG must be done on the night preceding MSLT to rule out other sleep disorders and to document adequate nocturnal sleep time (6 hours).
- Narcolepsy is characterized by:
  - Excessive daytime sleepiness
  - Cataplexy
  - Hypnogogic hallucinations
  - Sleep paralysis
- Idiopathic hypersomnia is characterized by:
  - Excessive daytime sleepiness despite adequate sleep in the absence of another sleep disorder

*All other indications for an MSLT are considered experimental and investigational since effectiveness for other indications has not been established.

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Evaluation of Suspected Periodic Limb Movement Disorder (Kushida, 2005; Sateia, 2014):

- Polysomnography is indicated when patient or an observer report repetitive limb movements during sleep with any of the following:
  - Frequent awakenings
  - Difficulty maintaining sleep
  - Excessive daytime sleepiness; AND
  - No known concurrent untreated sleep disorder

PSG is not indicated in other sleep related movement disorders (restless leg syndrome, bruxism, sleep related leg cramps, rhythmic movement disorder or sleep related myoclonus) unless another underlying sleep disorder is suspected.

Indications for Home Sleep Study, Unattended – Adults (Collop, 2007; Kapur, 2017):
Home sleep testing (HST) for obstructive sleep apnea (OSA) should be performed in conjunction with a comprehensive sleep evaluation and adequate follow-up. A comprehensive sleep evaluation should include a sleep history (snoring, apneas, daytime sleepiness), BMI, neck circumference, cardiopulmonary examination, and identification of comorbid sleep disorders and medical conditions.

Home sleep test (HST): Unattended (home) sleep studies are considered medically necessary for patients with symptoms suggestive of OSA when the home sleep study is used as part of a comprehensive sleep evaluation, using a Type II, Type III, or Type IV device measuring airflow. Home sleep tests are considered inappropriate for testing people with co-morbid conditions, people who are suspected of having sleep disorders other than obstructive sleep apnea (OSA), and those who are not in the category of high risk for moderate to severe OSA. There may be some situations in which home sleep test may require follow-up with an attended test when the home test is negative or there are other factors that contribute to a technical failure.

Contraindications for a Home Sleep Study, Unattended – Adults

Comorbid Medical Conditions:

- Moderate to severe pulmonary disease with: FEV1/FVC 0.7 and FEV1 less than 80% predicted, oxygen use, daytime hypercapnia or hypoxemia.
- Obesity hypoventilation syndrome: BMI > 35 plus arterial blood gas with PCO2 > 45, BMI > 35 plus inability to lie flat in bed, or BMI > 40
- Chronic opiate medication use
- Neuromuscular disease (e.g., Parkinson's disease, ALS, myotonic dystrophy, spina bifida)
- Congestive Heart Failure: NYHA class III or IV, or LVEF less than 45%
- Stroke

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Contraindications for a Home Sleep Study, Unattended – Adults continued

Comorbid Sleep Disorders, known or suspected:

- Periodic Limb Movement Disorder
- Parasomnia
- REM Behavior Disorder
- Nocturnal seizures
- Narcolepsy or idiopathic hypersomnia
- Circadian Rhythm Disorder
- Central sleep apnea or complex sleep apnea
- Hypoventilation
- Sleep-related hypoxemia
- Severe insomnia Technical Contraindications
- Inability to follow instructions or lack of mobility or dexterity to use portable equipment and the absence of a competent caregiver
- Previous negative or technically inadequate home sleep study

Other:

- Low pre-test probability of sleep apnea**
- Screening for asymptomatic individuals in high-risk populations.

Note: If a single home sleep study is inconclusive or technically inadequate or negative with continued clinical suspicion of OSA, an attended polysomnography (PSG) is recommended (Kapur, 2017). Adults for whom unattended sleep studies are contraindicated should have an attended sleep study.

Indications for Sleep Study, Attended – Pediatric Patients

Respiratory Indications:

- Habitual snoring with one or more of the below signs or symptoms of obstructive sleep apnea syndrome (0SAS) to differentiate from primary snoring.

Symptoms	Signs
Frequent snoring (≥3 nights/week)	Underweight or overweight
Gasps/observed apneas/snorting noises	Tonsillar hypertrophy
Labored breathing during sleep	Adenoidal facies
Cyanosis	Micrognathia/retrognathia
Sleeping in a seated position or with an extended neck	High-arched palate
Cyanosis	Hypertension
Attention-deficit/hyperactivity disorder	
Learning problems	
Daytime sleepiness	
Sleep enuresis (especially secondary enuresis)	

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Indications for Sleep Study, Attended – Pediatric Patients continued

Respiratory Indications continued:
In children, OSAS is often associated with daytime neurobehavioral problems (e.g., inattention, hyperactivity, impulsivity, and irritability). Daytime sleepiness is less common than in adults.

- Children being considered for adenotonsillectomy to treat OSAS
- Suspected congenital central alveolar hypoventilation syndrome
- Suspected sleep related hypoventilation due to chest wall deformities or neuromuscular disorders (e.g., Duchenne muscular dystrophy, Charcot-Marie-Tooth disease, myotonic dystrophy, congenital myopathies) (Tolaymat, 2017).
- In the following respiratory disorders only if there is a clinical suspicion for an accompanying sleep related breathing disorder:
  - Chronic asthma
  - Cystic fibrosis
  - Pulmonary hypertension
  - Bronchopulmonary dysplasia
  - Chest wall abnormality, such as kyphoscoliosis
- Following an apparent life-threatening event (ALTE) where there is clinical evidence of sleep-related breathing disorder.
- Neurological disorders (e.g., myelomeningocele, Chiari malformation, known brain lesion) (Leu, 2015; Patel, 2015; Tolaymat, 2017).
- Genetic disorders such as achondroplasia, Down syndrome, Prader-Willi syndrome, Ehler-Danlos syndrome Pierre Robin sequence, sickle cell disease and mucopolysaccharidosis (Zaffanello, 2018).

Non-Respiratory Indications:

- Suspected narcolepsy (PSG/MSLT) as suggested by the presence of:
  - Excessive daytime sleepiness
  - Cataplexy
  - Hypnogogic hallucinations
  - Sleep paralysis
- Hypersomnia from suspected causes other than narcolepsy (PSG/MSLT)
- Suspected parasomnia or seizure disorders:
  - Non-REM parasomnias, epilepsy, or nocturnal enuresis when there is a clinical suspicion for co-morbid sleep disorder such as sleep-disordered breathing or periodic limb movement disorder (PLMD).
  - To confirm the diagnosis of an atypical or potentially injurious parasomnia or differentiate a parasomnia from sleep-related epilepsy
- Suspected restless leg syndrome or periodic limb movement disorder:
  - When patient or an observer reports repetitive limb movements during sleep along with frequent awakenings, fragmented sleep, difficulty maintaining sleep, or excessive daytime sleepiness; OR
  - To document periodic limb movements when PLMD or RLS is suspected

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Note: **The following is NOT indicated:**

- Home (unattended) sleep studies (Kirk, 2017)
- Polysomnography for management of oxygen therapy
- Nap (abbreviated) polysomnography
- PSG for sleep-related bruxism

Note*:* Studies may be done for pediatric patients <18 years old as medically indicated.

Billing Information

Note: CPT codes, descriptors, and other data only are copyright 2022 American Medical Association. All rights reserved.

Diagnosis Codes:

Providers must bill the diagnosis code(s) to the highest level of specificity that supports medical necessity. For professional claims, the diagnosis must be the primary or secondary diagnosis.

Use the following ICD-10 diagnosis codes:

G4730	G4731	G4732	G4733	G4734	G4735	G4736	G4737
G4739	G47411	G47419	G47421	G47429	G4750	G4751	G4752
G4753	G4754	G4759	G4762	G4769			

In addition to the above diagnosis codes for members of all ages, the following diagnosis codes will be covered for sleep studies for children aged 20 years and younger:

G2581	G4700	G4710	G4761	G478	G479	R0683	Z930

Billing Codes:

Providers are required to select the most specific billing code that accurately describes the service(s) provided. Refer to the CPT codebook for complete descriptions.

95782	95783	95800	95801	95805	95806	95807	95808
95810	95811						

Modifiers:

Providers are required to follow applicable modifier guidelines.

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Billing Units:
Polysomnography and sleep studies may be billed as a complete procedure or as professional and technical components.

i. Polysomnography and sleep studies are limited to one procedure per date of service by the same or different provider.
ii. The technical or the professional component cannot be billed by the same or different provider on the same date of service as the complete procedure is billed.
iii. The complete procedure is viewed as an episode of care that may start on one day and conclude on the next day. When billing for the complete procedure, the date that the procedure began is the date of service that should be billed. The complete procedure should not be billed with two dates of services.
iv. If components are billed, the technical and the professional components should be billed with the date the service was rendered as the date of service

Separate reimbursement is not allowed for the following procedures on the same date of service by the same or different provider.

i. CPT codes 93224 through 93272 with CPT codes 95805 through 95811
ii. CPT codes 94760 and 94761 with CPT codes 95805 through 95811
iii. CPT code 94772 with CPT codes 95805 through 95806
iv. CPT code 94660 with CPT code 95811
v. CPT codes 95812 through 95827 with CPT codes 95808 through 95811
vi. CPT code 92516 with CPT codes 95808 through 95811

Place of Service:

- Inpatient hospital
- Off campus outpatient hospital
- On campus outpatient hospital
- Physician’s office

8400. MEDICAID Updated 11/25

Sleep Study (Attended and Unattended) and Polysomnography Services continued

Covered Provider Types/Specialties:
Provider types allowed to bill and be reimbursed for sleep studies/polysomnography are as follows:

Allowable PT/PS
01/010 - Hospital (Global)
09/093 - APRN
09/094 - CRNA
10/100 - Physician Assistant
31/310 - Allergist
31/316 - Family Practitioner
31/318 - General Practitioner
31/322 - Internist
31/326 - Neurologist
31/332 - Otologist, Laryngologist, Rhinologist
31/336 - Physical Medicine and Rehab Practitioner
31/340 - Pulmonary Disease Specialist
31/341 - Radiologist
31/344 - General Internist
31/345 - General Pediatrician
31/351 - Indian Health Services

Note: Indian Health Centers (IHC) should receive their respective encounter rate. Sleep studies and polysomnography are not covered as RHC/FQHC services.

Reference: 2021 Magellan Clinical Guidelines-SLEEP STUDY

Surgery – Ambulatory/Outpatient

- Ambulatory surgery centers and outpatient hospitals will be reimbursed for multiple outpatient surgical procedures performed on the same day as follows: 100% of the current Medicaid rate for the highest value procedure, 50% of the current Medicaid rate for the second procedure, and 25% of the current Medicaid rate for all subsequent procedures.
- IVs, medications, supplies, and injections provided on the same day as an ambulatory/outpatient surgery procedure are considered content of service of the surgery and cannot be billed separately.
  Exception: The following thrombolytic enzymes are not considered content of service when billed in conjunction with outpatient surgery: J2997, J2993, J3364, J2995, and J0350.
- Anesthesia (equipment and supplies), drugs, surgical supplies and other equipment of the operating room and the recovery room are considered content of service of the ambulatory/outpatient surgical procedure.

Surgery – Breast Reconstruction

- Breast reconstruction is covered when the member had a mastectomy for breast cancer on or after March 1, 2005. Only the following breast reconstruction codes are covered. For the most current information and verification of coverage, access Reference Codes under the Provider tab on the public and secure websites.

Outpatient Codes			Physician Codes			
11970	11971	19316	11970	11971	19316	19340
19340	19342	19350	19342	19350	19357	19361
19357			19364	19367	19368	19369
			69990	69990		

- This coverage is limited to one breast reconstruction process per breast per lifetime.

Surgery – Cosmetic

All surgeries which are cosmetic in nature (and related complications) are not covered. **Any medically necessary procedure which could ever be considered cosmetic in nature must receive PA**. The hospital must have a copy of the physician's PA for claim processing purposes.

Surgery – Elective

- The Medicaid program will not reimburse for inpatient/outpatient elective surgery unless the member is a KBH-EPSDT member.
- Certain surgical procedures will be reviewed on a postpay random sample basis. Retain all documentation supporting the nonelective nature of the surgery for review. Supporting documentation includes admission notes/history and physical, operative report and pathology report. If the documentation does not support the nonelective nature of the surgery, reimbursement for **all** claims relating to the surgery will be recovered.

Therapy

- Therapy treatments are not covered for a psychiatric diagnosis.

Habilitative – Therapy treatments performed in the LEA settings may be habilitative or rehabilitative for disabilities due to birth defects or physical trauma/illness. Therapy of this type is covered only for members 0 to under 21 years of age. Therapy **must** be medically necessary. The purpose of this therapy is to maintain maximum possible functioning for children. LEAs billing for occupational, physical, or speech therapy must have the ordering, referring, or prescribing provider's NPI on the claim. The prescribing provider must be enrolled with KMAP and have a valid NPI for claims to be considered for payment.

Note: For additional information regarding developmental therapy services, reference General Therapy Guidelines and Requirements in **Section 2710** of the *General Benefits Fee-for-Service Provider Manual*.

8400. MEDICAID Updated 12/24

Therapy continued

Rehabilitative – All therapies **must** be physically rehabilitative. Therapies are covered only when rehabilitative in nature and provided following physical debilitation due to an acute physical trauma or physical illness and prescribed by the attending physician.

- Therapy services are limited to six months for non-KBH-EPSDT members (except the provision of therapy under HCBS), per injury, to begin at the discretion of the provider. There is no limitation for KBH-EPSDT members.
- Providers of rehabilitative therapy can submit claims with a combination of the following rehabilitation therapy procedure codes and an appropriate diagnosis code.
    - Diagnosis code Z5189 can be used as the primary diagnosis. Providers are required to submit a secondary diagnosis code to describe the origin of the impairment for which rehabilitative therapy is needed when one of these V-codes or Z5189 is billed as a primary diagnosis.

SPECIALIZED WHEELCHAIR SEATING ASSESSMENTS

Effective with dates of service on and after January 1, 2025, the following guidance is applicable to specialized Wheelchair Seating Assessments (WSAs).

- Specialized WSAs will not be limited to the previously identified specialized wheelchair seating clinics.
- Providers will no longer be required to be a designated specialized wheelchair seating center or have a formal interdisciplinary team.
- Specialized WSAs may also take place in the home or other natural member environment.
- Members must be offered a choice of DME provider.

SPECIALIZED WHEELCHAIR ASSESSMENTS continued

Complex Rehabilitation Technology (CRT) includes medically necessary and individually configured manual and power wheelchairs, seating and positioning systems, and other adaptive equipment. This specialized equipment requires evaluation, configuration, fitting, adjustment, or programming to meet the individual's medical needs and maximize function and independence. These products are designed to meet the specific and unique medical and functional needs of an individual with a primary diagnosis resulting from a congenital disorder, progressive or degenerative neuromuscular disease, or from injury or trauma.

Specialized WSAs are considered medically necessary for members who meet the following criteria:

1. Are unable to sit safely on a conventional seating surface or standard wheelchair.
2. Require specialized positioning to safely perform essential activities of daily living without an assistive device.
3. Exhibit one or more of the following functional limitations:
    a. Significant head and trunk instability and /or weakness.
    b. Significant hypotonicity, hypertonicity, athetosis (writhing movements), ataxia (loss of muscle control/coordination), spasticity or muscle spasming which results in uncontrollable movements and position change.
    c. Absence or latency of protective reactions.
    d. Inability to maintain an unsupported sitting position independently.

The evaluation may be completed in a natural environment such as, home or treating outpatient clinic.

WSAs must be done in collaboration with the following providers:

Category A:

Physician, Doctor of Osteopathy, Physician Assistant, Nurse Practitioner, Advance Practice Registered Nurse (Initiates the order and supplies documentation; not required to be at the clinic appointment).

- 09/094 Nurse Practitioner
- 10/100 Physician Assistant
- 31/000 Physician

Category B:

A specialty WSA must be performed by a licensed or certified medical professional (such as a Physical Therapy (PT), Occupational Therapy (OT) or physician) within their scope of practice, who has no financial relationship with the DME provider and has specific training or experience in CRT wheelchairs or CRT wheelchair seating evaluations.

- 01/010 Hospital, Acute Care
- 01/012 Hospital, Rehabilitation
- 17/170 Physical Therapist
- 17/171 Occupational Therapist

SPECIALIZED WHEELCHAIR ASSESSMENTS continued

Category C:

Assistive Technology Professional (ATP), employed by a DME and must have certification from Rehabilitation Engineering and Assistive Technology Society of North America (RESNA). The ATP must meet the supplier and quality standards established for DME suppliers and must be present during member evaluation to:

- Assist in selecting the appropriate CRT items for such needs and capacities.
- Provide the member technology- related training in the proper use and maintenance of the selected CRT items.
- Be directly involved with the assessment, and determination of the appropriate individually configured complex rehabilitation technology for the member, with such involvement to include seeing the member in person within a reasonable time frame during the determination process. This service will not be allowed via telemedicine.

***Note*:** The DME supplier must maintain a reasonable supply of parts, adequate physical facilities, and qualified services or repair technicians to provide members with prompt service and repair of all CRT it sells or supplies. Must provide the member written information at the time of sale as to how to access services and repairs.

Specialized WSAs/evaluations and DME must have a physician order and a letter of medical necessity. The physician must have a face-to-face encounter with the member in accordance with 42 CFR 440.70 (f) (2). The physician must sign off on the completed evaluation.

Members that have previously received a specialized WSA will not require a re-evaluation to receive wheelchair repairs or updates unless deemed medically necessary.

***Note**:* Members who do not have functional limitations as noted above and are not dependent on CRT devices will not require specialized WSAs to obtain a standard wheelchair for ambulation.

Wheelchair seating assessment services will be billed with codes **97542** and **97755** and are payable only to the therapist (Provider Type/Provider Specialty (PT/PS) 17/170 or 17/171) or the hospital billing on behalf of the therapist (PT/PS 01/010 or 01/012). Reimbursement will not exceed $500 per member per year for seating assessments.

PT and OT evaluations and re-evaluations are a covered service, this policy will allow members to receive periodic PT and OT evaluations as reasonable and necessary for purchase of a new wheelchair and/or adjustments to their current wheelchair.

97161	97162	97163	97164	97165	97166	97167	97168

SPECIALIZED WHEELCHAIR ASSESSMENTS continued

Documentation Requirements:
- Letter of medical necessity completed by the ordering physician or other qualified practitioner.
- Evaluation documentation completed by a qualified therapist.
- DME recommendation completed by a RESNA certified ATP.

A specialty WSA is an assessment performed by a licensed/certified medical professional (such as a PT, OT, or physician) who has no financial relationship with the DME supplier and who has specific training and experience in complex rehab technology wheelchair evaluations. The WSA includes the physical and functional evaluation, treatment plan, goal setting, preliminary device feature determination, trials/simulations, fittings, function related training, determination of outcomes, and related follow-up. This evaluation is performed in conjunction with an equipment supplier who is a RESNA certified ATP, and who assists with the home environment accessibility, system configuration, fitting, adjustments, programming, and product related follow-up.

The specialized WSA must include the following:
1. Diagnosis
2. Reason for referral
3. Medical history
4. Current wheelchair and seating system
5. Concerns/problem list
6. Description of orthopedic, neurologic, positioning needs
7. Functional capabilities of the member
8. Data including range of motion, muscle testing, strength, weight, body measurements, etc.
9. Goals and objectives related to the wheelchair and seating system.
10. List of specific wheelchair frames, parts, cushions, backs, accessories and components and medical/functional reasoning for each.

Specialty evaluation is required for:
Children and adults with functional limitations as noted above will require specialized WSA.
- A new CRT wheelchair or a replacement CRT wheelchair is limited to 1 per 5 years. Wheelchair replacement may occur sooner with medical necessity documentation. Kan Be Healthy – Early Periodic Screening, Diagnostic, and Treatment (KBH-EPSDT) participants are exempt from this limitation.
- A new custom contoured seating system or modification.
- Modification to a seating system
- An addition of power seating or alternative drive control to a wheelchair.

Prior authorization will not be required for specialized WSAs. Upon post pay review, claims submitted that do not meet criteria will be subject to recoupment.

Additional Specialized Seating for Wheelchairs Guidelines:
1. Procedure codes for special seating include all assembly of the special seating and attachment to the wheelchair.
2. Special seating codes are not covered for rental.

SPECIALIZED WHEELCHAIR ASSESSMENTS continued

3. If a manufacturer allows one free growth kit free of charge on pediatric wheelchairs, only second, third, or subsequent growth kits will be covered, if needed.
4. Manufacturer wheelchair options should be included under the wheelchair code and not itemized out under special seating codes. The allowable for the wheelchair is calculated accordingly.
5. Backdating is allowed for wheelchairs and special seating to the date the member was seen by the seating assessment provider.

Coverage Criteria

1. Covered for Medicaid members aged 0-999.
2. Not covered for MediKan.
3. Not covered for member in state institutions, adult care homes, or skilled nursing facilities.
4. Not covered for aspen seating.

Additional Coverage Criteria

1. Wheelchair (manual or power) criteria must also be met if wheelchair is being requested with special seating.
2. Headrests are covered for all tilt chairs.
3. Headrests are covered for non-tilt chairs if the member has a complete lack of head control.

Required Information

1. Itemized list and requested amounts for each item for every code requested
2. Estimated repair costs for member's current seating
    a. Explanation of why current seating cannot be repaired
    b. Age of current seating
3. Seating evaluation for members (within prior six months) must include:
    a. Medical necessity for each requested item including what deformities are going to be helped by the special seating and the projected outcomes
    b. Diagnosis, prognosis, and mobility
    c. Number of hours per day the member will be in the wheelchair
    d. Member's environment including accessibility of home, school, and transportation
4. Current MSRP
5. All other information as requested by Kansas Medicaid

A follow-up evaluation is required from the seating provider (post-pay) to verify the member received the recommended wheelchair and special seating. The provider must maintain this evaluation on file and submit to Kansas Medicaid upon request. If this statement is not on file or sent to Kansas Medicaid upon request, paid claims are subject to recoupment. A signed statement from the seating assessment provider that the member has failed to follow-up will be accepted.
***Note**:* Pricing guidelines will be according to current policy and procedures.

Pulmonary Rehabilitation
Pulmonary rehabilitation means a physician-supervised program for chronic obstructive pulmonary disease (COPD) and certain other chronic pulmonary disease such as but not limited to; asthma, cystic fibrosis, bronchiectasis, interstitial lung disease, perioperative conditions (thoracic or abdominal surgery, lung transplantation, lung volume reduction surgery), and conditions that affect pulmonary function (lung cancer, Guillain-Barre syndrome, sarcoidosis) designed to optimize physical and social performance and autonomy.

Pulmonary rehabilitation includes all the following components:

- Physician-prescribed exercise (some aerobic exercise must be included in each pulmonary rehabilitation session).
- Education or training closely and clearly related to the individual's care and treatment which is tailored to the individual's needs, including information on respiratory problem management and, if appropriate, brief smoking cessation counseling.
- Psychosocial assessment, include written evaluation of an individual's mental and emotional functioning as it relates to the member's rehabilitation or respiratory condition.
- Outcome's assessment, including beginning and end evaluations, objective clinical measures of effectiveness, and self-reported measures of shortness of breath and behavior.
- An individualized treatment plan detailing how components are utilized for each patient. The individualized treatment plan must be established, reviewed, and signed by a physician who is involved in the patient's care and has knowledge related to his or her condition, every 30 days.
- The PT/PS eligible for billing as both rendering and billing Provider are 31/340, 31/336, 01/010 and 01/012.

The outpatient Pulmonary Rehabilitation services are 94625 and 94626**.**

Transplants

- Heart, lung, and heart/lung transplants performed in approved in state or border city hospitals are covered.
- Bone marrow, cornea, kidney, and pancreas transplants performed in approved in state or border city hospitals are covered and do not require PA.
- Pancreas transplants are only covered when performed simultaneously with or following a kidney transplant.
- Services related to donor complications after transplant surgery will be reimbursed up to and including 60 days following the transplant surgery.
    - These services must be billed under the recipient's Medicaid ID number.
    - Services related to donor complications more than 60 days after the surgery are the responsibility of the donor and not billable to Medicaid.

Transplants – Heart, Heart-Lung, and Lung
Heart, heart-lung, and lung transplants for adult members will require prior authorization and must be performed by Medicare-approved facilities or facilities that are members of the United Network for Organ Sharing (UNOS).

Transplants continued

Heart Transplant

Medicaid considers heart transplantation for adults medically necessary for the following indications when the selection criteria listed below are met and none of the absolute contraindications are present:

- Uncontrollable life-threatening arrhythmias
- Cardiac re-transplantation due to graft failure
- Cardiomyopathy due to nutritional, metabolic, hypertrophic, or restrictive etiologies
- Congenital heart disease
- End-stage ventricular failure
- Idiopathic dilated cardiomyopathy
- Inability to be weaned from temporary cardiac-assist devices after myocardial infarction or nontransplant cardiac surgery
- Intractable coronary artery disease
- Myocarditis
- Postpartum cardiomyopathy
- Right ventricular dysplasia/cardiomyopathy
- Valvular heart disease

Selection Criteria for Human Heart Transplantation

For members off protocol, **ALL** the following criteria must be met.

- New York Heart Association (NYHA) Class III and Class IV for heart failure *(see table on next page)
  Note: This does not apply to pediatric members.
- Member has potential for conditioning and rehabilitation after transplant (e.g. member is not moribund)
- Life expectancy (in the absence of cardiovascular disease) is greater than 2 years
- No malignancy (except for non-melanomatous skin cancers) or malignancy has been completely resected or (upon individual case review) malignancy has been adequately treated with no substantial likelihood of recurrence with acceptable future risks
- Adequate pulmonary, liver, and renal function
- Absence of active infections that are not effectively treated
- Absence of active or recurrent pancreatitis
- Absence of diabetes with severe end-organ damage (neuropathy, nephropathy with declining renal function, and proliferative retinopathy)
- No uncontrolled and/or untreated psychiatric disorders that interfere with compliance to a strict treatment regimen
- No active alcohol or chemical dependency that interferes with compliance to a strict treatment regimen

Transplants continued

***NYHA Class III and Class IV for heart failure are defined as follows:**

Class III	Persons with cardiac disease resulting in marked limitation of physical activity. They are comfortable at rest. Less than ordinary activity (e.g., mild exertion) causes fatigue, palpitation, dyspnea, or anginal pain.
Class IV	Persons with cardiac disease resulting in inability to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency or of the anginal syndrome may be present even at rest. If any physical activity is undertaken, discomfort is increased.

Contraindications

A heart transplant is not covered for persons with any of the following contraindications:

- Presence of systemic diseases (e.g., autoimmune, collagen vascular disease)
- Presence of irreversible end-organ diseases (e.g., renal, hepatic, pulmonary)
- Presence of severe pulmonary hypertension with irreversibly high pulmonary vascular resistance
- Presence of a recent intra-cranial cerebrovascular event with significant persistent deficit
- Presence of bleeding peptic ulcer
- Presence of hepatitis B antigen
- Presence of diverticulitis
- Presence of life-threatening neuromuscular disorders
- Presence of HIV/AIDS with profound immunosuppression (CD4 count of less than 200 cells/mm3)
- Presence of amyloidosis

Note: Although amyloidosis is considered a contraindication to heart transplantation, exceptions may be made in circumstances where curative therapy of amyloidosis has been performed or is planned (e.g., stem cell transplantation in primary amyloidosis, liver transplantation in familial amyloidosis).

The following procedures are considered experimental and investigational because safety and effectiveness has not been established, or the clinical value has not been established:

- Xenotransplantation of the heart
- Left ventricular assist device as destination therapy
- Total artificial heart
- Breath test for heart transplant rejection
- AlloMap® molecular-expression blood test

The following CPT codes will be covered: 33940 and 33945.

Transplants continued

Heart-Lung Transplant

Kansas Medicaid considers heart-lung transplantation for adults medically necessary for persons with severe refractory heart failure plus either end-stage lung disease or irreversible pulmonary hypertension, when the following selection criteria are met, and no absolute contraindications listed below are present. Examples of qualifying conditions include the following:

- Chronic obstructive pulmonary disease with severe heart failure*
- Congenital heart disease associated with pulmonary hypertension that are not amenable to lung transplantation and repair by standard cardiac surgery
- Cystic fibrosis with severe heart failure*
- Eisenmenger's complex with irreversible pulmonary hypertension and severe heart failure*
- Irreversible primary pulmonary hypertension with severe heart failure*
- Pulmonary fibrosis with uncontrollable pulmonary hypertension or severe heart failure*
- Severe coronary artery disease or cardiomyopathy with irreversible pulmonary hypertension
- Severe pulmonary fibrosis with severe heart failure*

* **NYHA Class III and Class IV for heart failure** (see table in **Heart Transplant** portion)

Note: Heart-lung transplantation may be considered medically necessary for other congenital cardiopulmonary anomalies upon individual case review.

Selection Criteria

The member must meet the transplanting institution's selection criteria. In the absence of an institution's selection criteria, Kansas Medicaid considers heart-lung transplantation medically necessary when **ALL** criteria below are met:

- Absence of chronic high-dose steroid therapy
  Note: Due to problems in bronchial healing, persons receiving high-dose steroids are considered inappropriate candidates.
- Absence of acute or chronic active infections that are not effectively treated
- Absence of malignancy (other than non-melanomatous skin cancers) or malignancy has been completely resected or (upon medical review) it is determined that malignancy has been treated with small likelihood of recurrence and acceptable future risks
- Adequate functional status
  Note: Active rehabilitation is considered important to the success of transplantation. Under established guidelines, mechanically ventilated or otherwise immobile persons are considered poor candidates for transplantation.
- Adequate liver and kidney function, defined as a bilirubin of less than 2.5 mg/dL and a creatinine clearance of greater than 50 ml/min/kg
- Life expectancy (in the absence of cardiopulmonary disease) of greater than 2 years
- No active alcohol or chemical dependency that interferes with compliance to a strict treatment regimen
- No uncontrolled and/or untreated psychiatric disorders that interfere with compliance to a strict treatment regimen
- Absence of uncontrolled HIV/AIDS, defined as all the following:
  - CD4 count greater than 200 cells/mm3 for more than 6 months
  - HIV-1 RNA (viral load) undetectable
  - On stable anti-viral therapy more than 3 months

Transplants continued

Selection Criteria continued

- No other complications from AIDS, such as opportunistic infections (e.g., aspergillus, tuberculosis, Pneumocystis carinii pneumonia, toxoplasmosis encephalitis, cryptococcal meningitis, disseminated coccidioidomycosis, other resistant fungal infections) or neoplasms (e.g., Kaposi's sarcoma, non-Hodgkin's lymphoma).

Contraindications

A heart-lung transplant is considered not medically necessary for persons with any of the following contraindications because the risks of transplantation exceed the benefits:

- Gastro-intestinal disease (e.g., bleeding peptic ulcer, diverticulitis, chronic hepatitis, active or recurrent pancreatitis)
- Multisystem disease
  Note: Persons with potentially multisystem diseases such as systemic sclerosis (scleroderma) or other collagen vascular diseases such as systemic lupus erythematosus must be carefully evaluated to ensure that their disease is primarily confined to the lung. Persons with diabetes must be carefully evaluated to rule out significant diabetic complications such as nephropathy, neuropathy, or retinopathy.
- Other effective medical treatments or surgical options available
- Progressive neuromuscular disease
- Refractory uncontrolled hypertension
- Severe musculoskeletal disease with debilitating thoracic involvement
- Smoking
  Note: Persons with a history of smoking must be abstinent for at least 3 months before being considered a candidate for a lung transplant.
- Untreated or unstable cerebrovascular disease

The follow CPT codes will be covered for heart-lung transplantation: 33930 and 33935.

Lung Transplant

Kansas Medicaid considers lung transplantation for adults medically necessary for any of the qualifying conditions for members who meet the transplanting institution's selection criteria. In the absence of an institution's selection criteria, members must meet both the general selection criteria and any applicable disease-specific selection criteria (see General Selection Criteria portion) and any applicable disease-specific selection criteria (see the Disease-Specific Selection Criteria accompanying the following list of Qualifying Conditions).

Transplants continued

Qualifying Conditions for Lung Transplantation (not an all-inclusive list):

- Alpha1-antitrypsin deficiency. Persons who meet the emphysema/alpha1-antitrypsin deficiency disease-specific selection criteria below.
- Broncho-pulmonary dysplasia.
- Congenital heart disease (Eisenmenger's defect or complex): Persons who meet the disease-specific criteria for Eisenmenger's below.
- Cystic fibrosis: Persons who meet the disease-specific selection criteria for cystic fibrosis.
- Graft-versus-host disease or failed primary lung graft.
- Lymphangioleiomyomatosis (LAM) with end-stage pulmonary disease.
- Obstructive lung disease (e.g., bronchiectasis, bronchiolitis obliterans, chronic obstructive pulmonary disease [COPD], emphysema): For persons with pulmonary fibrosis, see the disease-specific selection criteria for pulmonary fibrosis below.
- Primary pulmonary hypertension: Persons who meet the disease-specific selection criteria for primary pulmonary hypertension.
- Restrictive lung disease (e.g., allergic alveolitis, asbestosis, collagen vascular disease, desquamative interstitial fibrosis, eosinophilic granuloma, idiopathic pulmonary fibrosis, post-chemotherapy, sarcoidosis, and systemic sclerosis [scleroderma]): For persons with sarcoidosis, see the **Disease-Specific Selection Criteria** below.

Disease-Specific Selection Criteria

- Lung transplant for cystic fibrosis (CF) is considered medically necessary for persons who meet the general selection criteria for lung transplantation and exhibit at least two of the following signs and symptoms of clinical deterioration:
    - Cycling intravenous antibiotic therapy
    - Decreasing forced expiratory volume in 1 second (FEV1)
    - Development of carbon dioxide (CO2) retention (pCO2 greater than 50 mm Hg)
    - FEV1 less than 30% predicted
    - Increasing frequency of hospital admission
    - Increasing severe exacerbation of CF, especially an episode requiring hospital admission
    - Initiation of supplemental enteral feeding by percutaneous endoscopic gastrostomy or parenteral nutrition
    - Noninvasive nocturnal mechanical ventilation
    - Recurrent massive hemoptysis
    - Worsening arterial-alveolar (A-a) gradient requiring increasing concentrations of inspired oxygen (FiO2)
- Lung transplant for emphysema (including alpha 1-antitrypsin deficiency) is considered medically necessary for persons who meet the general criteria for lung transplantation and both of the following clinical criteria:
    - Hospitalizations for exacerbation of COPD associated with hypercapnia in the preceding year. Hypercapnia is defined as pCO2 greater than or equal to 50 mm Hg with hospitalizations and/or the following associated factors:
        - Declining body mass index
        - Increasing oxygen requirements

Transplants continued

Disease-Specific Selection Criteria continued

- Reduced serum albumin
- Presence of cor pulmonale (defined as clinical diagnosis by a physician or any two of the following:
  - Enlarged pulmonary arteries on chest X-ray
  - Mean pulmonary artery pressure by right heart catheterization of greater than 25 mm Hg at rest or 30 mm Hg with exercise
  - Pedal edema or jugular venous distention
  - Right ventricular hypertrophy or right atrial enlargement on EKG
- FEV1 less than 30% predicted

- Lung transplant for Eisenmenger's complex is considered medically necessary for persons who meet the general criteria for lung transplantation and any of the following disease-specific criteria:
  - Marked deterioration in functional capacity (NYHA Class III)
  - Pulmonary hypertension with mean pulmonary artery pressure by right heart catheterization greater than 25 mm Hg at rest or 30 mm Hg with exercise
  - Signs of right ventricular failure, progressive hepatomegaly, ascites
- Lung transplant for pulmonary fibrosis is considered medically necessary for persons who meet the general criteria for lung transplantation and any of the following disease-specific criteria:
  - Diffusing capacity for carbon monoxide (DLCO) less than 60% predicted
  - Presence of cor pulmonale (indicative of severe pulmonary fibrosis) or pulmonary hypertension
  - Total lung capacity (TLC) less than 70% predicted
- Lung transplant for pulmonary hypertension is considered medically necessary for persons who meet the general criteria for lung transplantation plus any of the following criteria, and valvular disease has been excluded by echocardiography:
  - Persons who are NYHA III, failing conventional vasodilators (calcium channel blockers or endothelin receptor antagonists)
  - Persons who are NYHA III, and have initiated or being considered for initiation of parenteral or subcutaneous vasodilator therapy
  - Pulmonary hypertension with mean pulmonary artery pressure by right heart catheterization of greater than 25 mm Hg at rest or 30 mm Hg with exercise, or pulmonary artery systolic pressure of 50 mm Hg or more defined by echocardiography or pulmonary angiography.

Note: NYHA Class III for heart failure is defined as: Persons with cardiac disease resulting in marked limitation of physical activity. They are comfortable at rest. Less than ordinary activity (i.e., mild exertion) causes fatigue, palpitation, dyspnea, or anginal pain.

Transplants continued

General Selection Criteria

The member must meet the transplanting institution's selection criteria. In the absence of an institution's selection criteria, **ALL** the following selection criteria must be met, and none of the contraindications listed below should be present:

- Absence of acute or chronic active infection (pulmonary or non-pulmonary) that is not adequately treated
- Adequate cardiac status (e.g., no angiographic evidence of significant coronary artery disease, ejection fraction greater than 40%, no myocardial infarction in last 6 months, negative stress test). Persons with any cardiac symptoms may require heart catheterization to rule out significant heart disease
- Adequate functional status
  Note: Under established guidelines, active rehabilitation is considered important to the success of transplantation. Mechanically ventilated or otherwise immobile persons are considered poor candidates for transplantation
- Adequate liver and kidney function, defined as a bilirubin of less than 2.5 mg/dL and a creatinine clearance of greater than 50 ml/min/kg
- Limited life expectancy of less than 2 years
  - No active alcohol or chemical dependency that interferes with compliance to a strict treatment regimen
    Note: Persons with a history of drug or alcohol abuse must be abstinent for at least 3 months before being considered an eligible transplant candidate.
  - No uncontrolled and/or untreated psychiatric disorders that interfere with compliance to a strict treatment regimen
  - Absence of inadequately controlled HIV/AIDS infection, defined as **ALL** the following:
    - CD4 count greater than 200 cells/mm3 for greater than 6 months
    - HIV-1 RNA (viral load) undetectable
    - No other complications from AIDS, such as opportunistic infection (e.g. aspergillus, tuberculosis, coccidioidomycosis, resistant fungal infections) or neoplasms (e.g. Kaposi's sarcoma, non-Hodgkin's lymphoma)
    - On stable antiviral therapy greater than 3 months

Contraindications

Lung transplantation is considered experimental and investigational for persons with the following contraindications to lung transplant surgery because the safety and effectiveness of lung transplantation in persons with these contraindications has not been established.

- Malignancy involving the lung (primary or metastatic)
  Note: Persons with a history of non-pulmonary cancer must be in remission before being considered a lung transplant candidate. Because of disappointing results, lung transplantation is considered experimental and investigational as a treatment for bronchioloalveolar carcinoma.

8400. MEDICAID Updated 02/16

Transplants continued

- Multi-system disease
  Note: Persons with potentially multisystem diseases such as systemic sclerosis (scleroderma), other collagen vascular diseases such as systemic lupus erythematosus, or sarcoidosis must be carefully evaluated to ensure that their disease is primarily confined to the lung. Persons with diabetes must be carefully evaluated to rule out significant diabetic complications such as nephropathy, neuropathy, or retinopathy.
- Other effective medical treatments or surgical options available
- Presence of gastrointestinal disease (e.g. bleeding peptic ulcer, chronic hepatitis, diverticulitis)
- Refractory uncontrolled hypertension
- Single-lung transplantation is contraindicated in persons with chronic pulmonary infections (e.g. bronchiectasis, chronic bronchitis, and cystic fibrosis)
- Smoking
  Note: Persons with a history of smoking must be abstinent for 6 months before being considered eligible for lung transplantation.
- Kansas Medicaid considers lobar (from living-related donors or cadaver donors) lung transplantation medically necessary for persons with end-stage pulmonary disease when selection criteria are met (see above).
- Kansas Medicaid considers lung xenotransplantation (e.g., porcine xenografts) experimental and investigational for any pulmonary conditions because of insufficient evidence in the peer-reviewed literature.
- Kansas Medicaid considers prophylactic anti-reflux surgery to improve lung function and survival in lung transplant recipients without gastroesophageal reflux disease as experimental and investigational because of insufficient evidence in the peer-reviewed literature.

The following CPT codes will be covered for lung transplantation:
32850, 32851, 32852, 32853, and 32854.

Transplants – Renal Dialysis and Kidney

- When it has been determined a member has chronic renal disease (CRD) requiring renal dialysis, the member or his representative should apply for Medicare CRD eligibility.

Transplants continued

- Medicare allows for payment of claims for eligible members with chronic renal disease and will reimburse for maintenance dialysis the third month after the maintenance dialysis starts. Medicare will reimburse for maintenance dialysis in the first three months if the member has been involved in self-training in a self-care dialysis unit or through a self-care home dialysis support service provided by a qualified provider. They also reimburse for expenses incurred for a kidney transplant including those for the kidney donor.
- Medicaid will reimburse claims for services related to chronic renal dialysis and/or kidney transplants only after proof has been attached to one claim that the member has applied for Medicare and coverage has been approved or denied. The Medicare CRD eligibility information will be retained in the claims processing system. Therefore, subsequent claims do not need to have proof of Medicare CRD eligibility approval or denial attached.
- Acceptable proof of application and coverage or denial by Medicare are:
  - Medicare EOMB/RA
  - Member health insurance card
  - Report of Confidential Social Security Benefit Information
  - Letter from Medicare or Social Security explaining that the member has applied for Medicare and whether member is eligible

Tuberculosis

- Inpatient services related to a TB diagnosis, including physician and laboratory services, may be covered for members with the TB benefit plan.
- Inpatient hospitalization, including physicians' services for diagnostic evaluation of members highly suspected of TB, may be covered for completion of the diagnosis.
- Acute problems, which are present on admission or arise during hospitalization and are related to the diagnosis of TB, may be covered.
- Hospitalization for monitoring toxicity of anti-tuberculosis drugs is covered.
- Claims for inpatient or outpatient services may be billed directly to KMAP.
- Coverage and payment of services provided to members on the TB benefit plan are coordinated by KDHE. Contact KDHE at 785-296-0739 for determination of coverage.
- Coverage and payment of inpatient or outpatient services are subject to compliance with infectious disease reporting requirements as directed by K.A.R. 28-1-2.
- Anti-tuberculosis drugs to treat the member and family members are provided at no cost by KDHE. Contact your local health department or KDHE at 785-296-2547.

Vagal Nerve Stimulators

- Vagal nerve stimulators (VNS) are covered for members with epileptic disorders. With exception of code 95970, all services must be prior authorized.
- VNS services must meet the following conditions:
    - VNS is restricted to members four years of age and older. The member's physicians are expected to determine if VNS surgery is appropriate and to document those findings in the medical record.
    - The member must have an epileptic disorder. VNS will not be covered for members with progressive disorders.
    - Mental retardation with epilepsy is not a contraindication for VNS but must be considered with other factors.
    - All other courses of treatment must be documented, such as conventional and anticonvulsant drugs.
    - Providers are expected to maintain adequate documentation, such as "decreased seizure activity" or "improvement in seizure condition."

Vacuum Assisted Wound Closure Therapy

Vacuum assisted wound closure therapy is covered for specific benefit plans. PA is required and criteria must be met. Refer to the *DME Fee-for-Service Provider Manual* for criteria. For questions about service coverage for a given benefit plan, contact the KMAP Customer Service Center at 1-800-933-6593. All PA must be requested in writing by a KMAP DME provider. All medical documentation must be submitted to the KMAP DME provider.

8410. MEDICAID – INPATIENT ONLY Updated 12/23

General Hospital Reimbursement Policies

- Payment for general inpatient hospital services is based on the following equation: DRG weight times (X) group payment rate plus (+) outlier costs, if appropriate. Inpatient claims are reimbursed based on the lesser of the DRG amount or the billed amount. Contractors may perform audits on inpatient claims. See the **Utilization Review** portion below for details.
- Medicaid does not reimburse for days not medically necessary or deemed "not payable" by federal or state laws, regulations, or state policy.
- All DRGs have the potential for day or cost outliers.
- When a stay is eligible for both day and cost outliers, the greater of the two is paid.
- If a Medicaid member is transferred from one hospital to another, the reimbursement to the transferring hospital will be the DRG daily rate for each covered day of stay. Total payment to the transferring hospital will be no greater than the standard DRG amount, except where the transferring hospital is eligible for outlier payments. The discharging hospital will be reimbursed the standard DRG amount. If the claim qualifies as an outlier, the discharging hospital will be eligible for an outlier payment based solely on the length of stay at the discharging hospital.
- When a Medicaid member is discharged prematurely and subsequently readmitted within 15 days, only the DRG payment for the first stay will be made if the discharging and readmitting hospital are the same. If the discharging and readmitting hospitals are not the same, only the readmitting hospital will be reimbursed.
- When the Medicaid member is not eligible for the entire inpatient stay, the DRG payment is prorated and reimbursement is made only for the days the member was eligible. Reimbursement shall not exceed the standard DRG payment plus any applicable outlier payment. (Only covered days are used to calculate outliers.) If the Medicaid member's inpatient hospital stay spans coverage between an MCO and fee-for-service (FFS), the entire stay will be considered by the entity in which the member was assigned to at the time of admission.
- Hospitals can issue a continued stay denial to a member only after the attending physician has written a discharge order. The hospital must supply the member with the necessary notification that the member will assume responsibility for payment since a continued stay is not considered medically necessary and is no longer a covered service.
- Admissions or day outliers found to be unnecessary by the utilization review contractor cannot be billed to the member.
- The discharge date indicated on each claim will determine the version to be used for DRG assignment and reimbursement.

Dental Admissions

Dental admissions are covered when medically necessary. Documentation supporting the medical or dental condition making hospitalization necessary must be in the medical record. PA is required for adults. Medical review is required for children 21 years of age and under.

Code G0330 will be covered when dental procedures are performed in an Operation Room (OR) or an Ambulatory Surgical Center (ASC) under monitored anesthesia for the facility rate.

Dental Admissions continued

Clarification for code 41899:
CPT code 41899 will cover dental procedures not otherwise described by existing dental procedure codes. Medical review for ages 20 years and younger and PA for ages 21 years and older will still be required.

Long-Term Care Units

Long-term care units **must** be a distinct or separate unit of a hospital certified to provide skilled and/or intermediate care under KMAP subject to the same federal and state rules and regulations as a free-standing adult care home. This includes compliance with federal regulations for standards of care and related reimbursement.

Noncovered Services

- Take home drugs
- Nonmedical hospital supplies (e.g. hospital kits, slippers, lotions, tissues, mouthwash)

Note: A consultation and a hospital visit are not covered when billed on the same date of service by the same provider.

Psychiatric

Institution of Mental Disease
Federal regulations classify free-standing psychiatric hospitals (provider specialty 011) as institutions for mental disease (IMDs). Medicaid reimbursement to IMDs and concurrent medical services are prohibited for members 22 to 64 years of age.

Substance Abuse
Acute detoxification is covered in any acute general hospital, when medically necessary. Alcohol and drug addiction treatment services provided in an inpatient hospital setting are not covered.

State Institutions for Mental Health

- State institution services are only covered for Medicaid members under 21 years of age or 65 years of age and older. (However, if a member is an inpatient in a state institution on their 21st birthday, state institution services will be covered until 22 years of age).
- State institutions are reimbursed at a per diem rate.
- Effective with dates of service on and after July 1, 2024, procedure code S9485 will be utilized for psychiatric observation services for patients under 18 awaiting a Mental Health Screen at a State Institutional Alternative (SIA) facility PT/PS 01/008 and 01/009. Reimbursement is available for up to three consecutive days from the request for a Mental Health Screen, provided the individual is subsequently admitted under the SIA program. If admission is not approved, no reimbursement will be issued.

State Institutions for Mental Health continued

During the observation period, the patient must receive:

- Evaluation by the Qualified Mental Health Professional with subsequent completion of the State approved Mental Health Screening Form
- A physical examination
- History and psychiatric assessment containing recommendations for ongoing treatment
- An initial nursing assessment
- Nursing progress notes are written each shift
- A discharge summary

A physician must admit and discharge the patient from the observation stay. If an SIA admission follows a psychiatric observation stay, the observation days should be billed on the outpatient claim using the SIA facility NPI. Payment for the observation period will not roll into the SIA payment for the admitting facility. Injections, supplies, and medications are included in the per diem rate during the observation stay.

- Procedure code S9485 is valid only for observation that leads to admission to the SIA program and is subject to close monitoring through utilization reporting and post-pay reviews/audits.
- A psychiatric diagnosis must be documented as a primary or secondary designation, along with a completed mental health screening form.

Utilization Review of General Hospitals

The utilization reviewer will not accept documentation including, but not limited to, admission orders that have been created after the claim has begun the utilization review (UR) process.

- Review of day or cost outlier cases are generally performed on a post-pay basis, unless interim bills are submitted, and the member is still inpatient. Stays billed on an interim basis will be reviewed as an entire stay once the final bill is processed and paid.
- Outlier reviews examine itemized bills to determine if the services are covered benefits, if charges are reasonable and medically necessary, and if the services should be bundled with the room and board charge. If there are itemized charges which should be denied on the outlier review, these charges will be deducted from the total billed amount. The resulting adjusted total billed amount will be used to perform the DRG payment calculation. Guidelines for outlier reviews include:
- The room and board revenue code, as defined by the UB-04 guidelines and Uniform Billing Editor, indicates the level of care provided to the patient. This code also provides information on the national "usual and customary" charges for that level of room and board. Normally, this rate includes the regular room, dietary and nursing services, minor medical and surgical supplies, medical social services, psychiatric social services, and the use of certain equipment and facilities for which a separate charge is not customarily made.
    - Routine supply items found in the "floor stock" would generally be available to all patients receiving supplies in that location. The supply items are included in the general cost of the room in which the services are delivered and are not separately billable.
    - Services identified in this *Hospital Fee-for-Service Provider Manual* as denied in an outpatient setting may also be reviewed during inpatient cost outlier review to determine

Utilization Review of General Hospitals continued

if these services are medically appropriate and separately billable from the room and board charge.
    - If the charge is not a covered benefit, it will be denied during the outlier review.
    - The item must be medically necessary, furnished at the direction of a physician, and delivered to or used on or for the patient for whom it was ordered.
    - Charges for personal comfort items requested by the patient are excluded from coverage. The patient may be charged for such a service if he or she requested it with knowledge that they will be charged. If the patient is not informed, they may not be charged, and the provider will not receive any reimbursement for these charges.
    - Pharmacy or implant charges greatly exceeding NADAC cost will be denied during the outlier review.
- Readmissions may be subject to utilization review. Utilization review of readmissions will occur for members who are readmitted as an inpatient to a general hospital between 1 and 15 days of discharge.
- Readmission guidelines for days 2-15 of a hospital stay, do not apply if Medicaid is not the primary payer of the initial inpatient stay claim.
- Shall be reviewed to determine if the readmission was the result of an inappropriate discharge from the initial admission based on one of the following criteria:
    - A medical readmission for a continuation or recurrence for the initial admission or closely related condition (e.g. readmission for diabetes following an initial admission for diabetes).
    - A medical complication related to an acute medical complication related to a care during the initial admission (e.g. patient discharged with urinary catheter readmitted for treatment of a urinary tract infection).
    - An unplanned readmission for a surgical procedure to address a continuation or a recurrence of a problem causing the initial admission (e.g. readmitted for appendectomy following a primary admission for abdominal pain and fever).
    - An unplanned readmission for a surgical procedure to address a complication resulting from care from the primary admission (e.g. readmission for drainage of a post-operative wound abscess following an initial admission for a bowel resection).
    - The unplanned readmission is the result of a need that could have reasonably been prevented by the provision of appropriate care consistent with accepted standards prior to discharge or during the post-discharge follow-up period.
    - An issue caused by a premature discharge from the same facility.
    - Readmission is medically unnecessary.
- The following are excluded from readmission review:
    - Readmission that is planned (such as for repetitive treatments, i.e. cancer chemotherapy, transfusions for chronic anemia, or other similar repetitive treatments).
    - Readmission due to malignancies, burns, cystic fibrosis, or anemia.
    - Readmission due to bone marrow transplants.
    - Obstetrical admission.
    - Readmission that stems from an initial stay discharge status of “left against medical advice.”

8410. MEDICAID – INPATIENT ONLY Updated 08/17

Utilization Review of General Hospitals continued

- Admission to a skilled nursing facility (SNF), long-term acute care facility (LTAC), or inpatient rehabilitation facility (IRF).
- Admission for treatment when the primary diagnosis is psychiatric.
- Transfer of patient to receive care not available at the first facility.

- All patient-initiated transfers are subject to utilization review.
- When a patient transfers from an inpatient hospital bed to a swing-bed unit and acute care continues to be provided, payment for the swing-bed will be denied or recouped. The only purpose for this type of transfer is for the hospital to obtain reimbursement beyond the DRG payment.
- Utilization reviewers may audit the diagnosis coding of a claim to make sure that the claim grouped to the correct MS-DRG code. The claim and all supporting medical documentation will be reviewed for correct coding of diagnoses, procedures, age, sex, discharge status, and the presence of complications or co-morbidities. Following DRG coding evaluation and adjustment by the utilization reviewer, payment of claims will be adjusted upward or downward.
- When an inpatient hospital admission is determined not to be medically necessary by the utilization reviewer and results in recoupment of payment, the provider may resubmit the claim as an outpatient service. Providers will need to review the inpatient admission recoupment letter for instructions and time frames for resubmittal.
- UR may be performed either onsite or by reviewing records sent as required to the UR contractor. If a hospital fails to provide the UR contractor with the complete requested information within the allowable time frames, the case will be denied, resulting in recoupment of payment. For FFS only, these "technical denials" are not eligible for reconsideration. If the facility supplies the UR contractor the information within 90 days of the "technical denial" date, the case may be reopened for review. Pending the review results, repayment for the case may occur.
- If the UR contractor elects to use an independent physician reviewer other than their inhouse medical director or staff, the identity of the physician reviewer will be kept confidential and not disclosed if the UR contractor does all the following:
  - The UR contractor or its staff reviews the same medical records as were used by the independent physician reviewer.
  - The UR contractor or its staff reviews the conclusions of the independent physician reviewer.
  - The UR contractor reaches the same or substantially the same conclusions as the independent physician reviewer.
  - The UR contractor or a member of its staff who participated in the review is present at and testifies in any administrative hearing, trial, or judicial proceeding concerning the UR review.
- The UR contractor or its staff may testify as to the qualifications of the independent physician reviewer without waiving the above identity protection of the independent physician reviewer.
- The UR contractor or its staff may offer a copy of the report from the independent physician reviewer where the identity of the independent physician reviewer is redacted and deleted from the report without waiving the above identity protection of the independent physician reviewer.
- The “need to testify” requirement (as satisfied by the foregoing paragraph) shall not apply in reviews of administrative decisions or in judicial reviews unless the UR contractor or its staff are

Utilization Review of General Hospitals continued

specifically subpoenaed to appear and testify in that proceeding. If the identity protection is allowed in the lower-level proceeding, that protection will continue throughout a review process. The purpose for the above identity protection is to ensure a forthright and candid peer review assessment of the medical records by a physician reviewer.

Discharge Day Not Medically Necessary

When a member's hospital discharge day is determined by the UR contractor to not be medically necessary, the discharge day is redefined as the last medically necessary day. This redefined discharge day is not reimbursed.

8420. MEDICAID – OUTPATIENT ONLY Updated 06/25

Blood

- Blood transfusions, including whole blood, red blood cells, plasma, platelets and cryoprecipitate, and IV infusions are covered services.
- Set-ups including volume controller cassettes are content of service of the procedure billed.

Care Coordination

Acceptable outpatient hospital referral documentation includes an entry in the hospital outpatient or emergency department medical record noting that the primary care provider (PCP) was contacted at the time the service was rendered and approval was given. The statement must be signed by the individual who received the approval. If the PCP cannot be reached, approval must be secured from one of his or her covering physicians.

Developmental Testing

Providers are reimbursed one visit per day. Codes 96112 and 96113 are only covered for KBH-EPSDT members.

Diagnostic Tests

Although not all codes are covered, most codes for laboratory, radiology, EKG, EEG, hearing, and speech testing (if provided following physical debilitation) are covered.

Drugs

- All drugs are content of service of surgery. Oral drugs are content of service of emergency treatment. Take-home drugs are noncovered.
- Injections, IVs, blood infusions, and aerosol inhalant additives are covered if not associated with surgery.
- Injections are not covered when billed on the same day as an office visit by the same provider. This applies to the following procedure codes:

Office visit

99056	99058	99202	99203	99204	99205	99211
99212	99213	99214	99215	99281	99363	99364
99381	99382	99383	99384	99385	99386	99387
99391	99397	X9003WP				

Injection

95115	95117

Electro-Convulsive Treatments

Electro-convulsive treatments are covered and include all ancillary services needed to provide the treatment, including the charge for use of a bed.

8420. MEDICAID – OUTPATIENT ONLY Updated 09/21

Emergency Medical Services for Aliens (SOBRA)

In addition to inpatient hospital and emergency room hospital, emergency services performed in outpatient facilities and related physician, lab, and X-ray services will be allowed for the following places of service: office, outpatient hospital, Federally Qualified Health Clinic, state or local public health clinic, Rural Health Clinic, ambulance, and lab for SOBRA claims. Inpatient hospital reimbursement will not be limited to 48 hours. Follow-up care will not be allowed once the emergent condition has been stabilized. Refer to **Section 2040** of the *General Benefits Fee-for-Service Provider Manual* for specific information.

Emergency Room Services

- Medical necessity documentation must accompany the claim when more than one ER visit is made on the same day for the same individual.

Laboratory

- Handling fee (drawing/collection) is considered content of service of the outpatient visit/lab procedure and is not covered if billed separately. The member cannot be billed for the drawing or collection since it is considered content of another service or procedure.
- Laboratory procedures performed on inpatients are content of service of the DRG reimbursement to the hospital and should not be billed by either the independent laboratory or hospital.
- Pathologists not contracted by the hospital may bill modifier 26 for pathology services provided on inpatients.
- Reimbursement will only be made for one complete blood count (CBC) per day.
- When ordered laboratory tests make up a panel or profile, the all-inclusive code should be used to bill. Components should not be billed separately.
- Three or more multichannel tests are considered a SMA/SMAC profile when performed on the same date of service. Medicaid follows the guidelines outlined in the *CPT* codebook to identify automated multichannel tests (SMACs, profiles) performed. When billing for a multichannel test use the appropriate code:

80002	80003	80004	80005	80006	80007	80008
80009	80010	80011	80012	80013	80014	80015
80016	80017	80018	80019			

- Urinalysis (UA) is considered content of service of the reimbursement to the physician for antepartum care when the UA is obtained for a diagnosis of pregnancy. The hospital/independent laboratory will not be reimbursed by Medicaid for the UA in this situation.
- Cytogenetic (chromosome) studies are covered for **pregnant women** (when medically necessary) and **KBH-EPSDT** members only. A medical necessity form must accompany the claim when billing for a cytogenetic study for a pregnant woman older than 21 years of age.
- HIV testing limitations are as follows:
    - Code 87536 is covered with no limits.

Laboratory continued

- The following HIV testing codes are limited to four per calendar year, regardless of provider:

86689	86701	86702	86703	87390	87391
87534	87535	87537	87538	87539	87900
87903	87904	80018	80019		

- The following HIV testing codes are limited to two per calendar year, regardless of provider:

87901	87906

  Medical necessity documentation for 87901 must include information that the patient meets at least one of the following criteria:
  - The patient presents with virologic failure during Highly Active Antiretroviral Therapy (HAART).
  - The patient has suboptimal suppression of viral load after initiation of antiretroviral therapy.

Note: Refer to the *CPT* codebook for complete descriptions of these procedures.

Hospitals, physicians, and independent laboratories must confirm the Clinical Laboratory Improvement Amendments (CLIA) status of the performing laboratory prior to billing the Kansas Medical Assistance Program (KMAP) for those services. Referring providers are required to confirm the CLIA status for the performing lab prior to billing KMAP for those services.

This is to be noted on the claim with the use of Modifier 90 – Reference (outside) Laboratory. When laboratory procedures are performed by a party other than the treating or reporting physician or other qualified health care professional, the procedure may be identified by adding modifier 90 to the usual procedure number.

Life Sustaining Therapy

Chemotherapy, radiation therapy, and renal dialysis are covered.

Medically Recalled Items and Services

- KMAP allows reimbursement of medically necessary procedures to remove and replace recalled or replaced devices. KMAP will not be responsible for the full cost of a replaced device if an inpatient or outpatient facility is receiving a partial or full credit for a device due to recall. Payment will be reduced by the amount of the device credit.
- Providers should code services with the appropriate modifier (FB or FC) or condition code (49 or 50) to indicate services have been medically recalled.
  - Modifier FB (item provided without cost to provider, supplier, or practitioner or credit received for replaced device) is used when items are provided without cost to the provider, supplier, or practitioner.
  - Modifier FC (partial credit or replaced device) is used when partial credit is received by the provider, supplier, or practitioner for the replacement device.
  - Condition code 49 signifies products replaced within the product lifecycle due to the product not functioning properly.

8420. MEDICAID – OUTPATIENT ONLY Updated 06/19

Medically Recalled Items and Services continued

- Condition code 50 is used for product replacement for a known recall of a product.

- In circumstances where KMAP has reimbursed the provider for repair or replacement of items or procedures related to items due to a medical recall, KMAP is entitled to recoup or recover fees from the manufacturer and/or distributor as applicable. In circumstances where KMAP has reimbursed the provider the full or partial cost of a replaced device and the provider received a full or partial credit for the device, KMAP is entitled to recoup or recover fees from the provider.

Noncovered Services

Medical supplies used in conjunction with outpatient surgery and/or the emergency room/observation room are considered content of service and cannot be billed separately. The rental or sale of DME and certain prosthetic and orthotic items are not covered.

Operating Room

Anesthesia (equipment and supplies), drugs, surgical supplies, and other equipment of the operating room, the recovery room and supplies are considered content of service of the operating and/or delivery room charges.

Outpatient Procedures

- Outpatient services provided within three days of an admission from the same hospital for the same or similar diagnosis are considered content of service of the inpatient hospital stay. In this instance, bill the outpatient charges together on an inpatient claim.
- There is one exception to this policy, complications from an outpatient sterilization resulting in an inpatient admission. In this instance, the outpatient charges and the inpatient charges should be billed on two separate claims.

Outpatient Prospective Payment System

- The 2018 Outpatient Prospective Payment System (OPPS)/Ambulatory Surgical Center (ASC) final rule (CMS -1678-FC) created two new modifiers:
  - JG (Drug or biological acquired with 340B Drug Pricing Program Discount)
  - TB (Drug or Biological Acquired With 340B Drug Pricing Program Discount, Reported for Informational Purposes)
- If a provider is required to report modifiers JG or TB to Medicare and the recipient has Kansas Medicaid, then these modifiers must also be reported to Kansas Medicaid.
- Modifier JG is used for separately payable drugs (status indicator "K") and will trigger a payment reduction when billed by a hospital paid under the OPPS that is not exempted from the payment adjustment.
- Drugs that were not acquired under the 340B Program should not be reported with modifier JG. Providers exempt from the Medicare 340B drug payment policy (rural school, children's hospital, and PPS cancer exempt hospital) should not report modifier JG to identify OPPS separately payable drugs purchased with a 340B discount but should use modifier TB instead.

Prosthetic & Orthotic Services

- Outpatient hospitals are allowed to bill the following prosthetic & orthotic code: L3980.
- DeFlux, an injectable medical device, is covered with PA. Use code L8606.

8420. MEDICAID – OUTPATIENT ONLY Updated 04/25

Psychiatric Observation Beds

- Psychiatric observation beds are covered up to three consecutive days. During the observation period, the member must receive:
    - A physical examination
    - History and psychiatric assessment containing recommendations for ongoing treatment
    - An initial nursing assessment
    - Nursing progress notes written each shift
    - A discharge summary

- A physician must admit the member to an observation bed. If, at the end of the observation period, the member is not admitted to the hospital or discharged, no additional payment will be made at the end of the observation stay. When an admission follows an observation stay, the physical examination report and the psychiatric assessment must be included in the member's medical record. The observation bed stay becomes part of the DRG payment to the hospital. Refer to **Section 7020** for billing instructions.
- Procedure code S9485 can used for psychiatric observation. Code H2013 is no longer covered. The appropriate revenue code to be utilized would be outpatient observation. The submitted claim for reimbursement of code S9485 should have a psychiatric diagnosis noted as either a primary or secondary designation.

Partial Hospitalization Psychiatric Care (PHP)/Intensive OP Treatment (IOP)

These services are covered only in those hospitals, ambulatory healthcare facilities, and clinics/centers where such a program is enrolled as an approved KMAP provider for these services. These providers will be required to provide their accreditation at the time of enrollment.

Eating Disorder Care

Effective with dates of service retroactive to January 1, 2025, the PHP and IOP for Eating Disorder Care shall be provided by providers enrolled with KMAP to individuals meeting medical necessity, with a mental health diagnosis for an eating disorder.

Covered Services

Coverage provided is limited to medically necessary treatment that is provided under the direction of a licensed treating physician and in accordance with a treatment plan. Services shall be provided for maximum reduction of physical or mental disability and restoration of a beneficiary to their best possible functional level.

8420. MEDICAID – OUTPATIENT ONLY Updated 04/25

Partial Hospitalization Psychiatric Care (PHP)/Intensive OP Treatment (IOP) continued

The following are the covered services and must be billed with allowable diagnoses listed below.

Visit Type	Code	Benefit Limits
Partial Hospitalization Psychiatric Care	H0035	• Maximum one unit per day (One unit of service is a one-day session). • Maximum five days per week (Minimum of 20 hours per week).
Intensive Outpatient Treatment (IOP) for Eating Disorder Care	S9480	• Maximum one unit per day (One unit of service is a one-day session).

Allowable Mental Health Diagnoses for Eating Disorder:
The care management for the treatment of eating disorders shall consider the overall medical and mental health needs of the individual with an eating disorder, shall not be based solely on weight, and preserves the patient's dignity to the greatest extent possible.

The following diagnosis should be associated to individuals receiving care and of which may be co-occurring.

Diagnosis Type	Diagnosis Code Range
Eating Disorder	F50.00 - F50.29 (Anorexia nervosa) F50.2 - F50.25 (Bulimia nervosa) F50.8 - F50.9 (Other eating disorders)

Covered Provider Types/Provider Specialties
The following are the covered provider type/provider specialties (PT/PS):

PT/PS	Specialty Description
01/011	Psychiatric Hospital
11/**021***	Partial Hosp Psych Care (PHP)/Intensive OP Treatment (IOP)

*Mental health providers should enroll under new specialty **021** using taxonomy **261QM0801X**.

Enrollment Requirements for Specialty 021

- Organizations shall hold a National Accreditation from a *one of* these nationally recognized entities with a Behavioral Health Accreditation attachment.
  - The Joint Commission (TJC) or
  - Commission on Accreditation of Rehabilitation facilities (CARF)
- Enrolled and credentialed as a Kansas Medicaid Provider.
- Form W-9.
- Organizations shall ensure all professional staff are licensed in the State of Kansas and all paraprofessional staff are appropriately certified and trained.

Partial Hospitalization Psychiatric Care (PHP)/Intensive OP Treatment (IOP) continued

Billing Guidelines

- Psychiatric hospitals (specialty 011) may bill for PHP or IOP services using its existing taxonomy codes: 273R00000X (Hospital Units/Psychiatric Unit) or 283Q00000X (Hospitals/Psychiatric Hospital).
- Mental health providers (specialty 021) may bill for PHP or IOP services using taxonomy code 261QM0801X (Ambulatory Health Care Facilities/Clinic/Center/Mental Health [including Community Mental Health Center]).
- Partial Hospitalization Psychiatric Care (PHP)- Code H0035:
  - Allowed one unit per day.
  - A maximum of 5 days shall be billed per week services for a minimum of 20 hours per week and would require inpatient psychiatric care if the partial hospitalization services were not provided.
- Intensive Outpatient Treatment (IOP)- Code S9480:
  - Allowed one unit per day.
  - A minimum of 2 service components (refer to core components section below) per session to achieve 9 to 19 hours of intervention per week for adults (18 yrs. +) and 6 to 19 hours of intervention per week for youth (ages 6-17 yrs).
- Services not reimbursable with IOP services.
  - Addiction and Recovery Treatment Services at ASAM levels 2.1-4.0: H0005 U5, H0004, H0018, H0015 U5, H0019
  - Opioid Based Outpatient Treatment Services: 80348, G2086, G2087, G2088, H0005, H0001, H0005 U5, H0006, H0006 U5, H0004, H0015 U5, H0007, J0570 J0571, J0572, H0015, J0575, J0573, J2315, Q9991, J0574
  - Psychosocial Rehabilitation: H2017, H2017TJ, H2017HQ
  - Assertive Community Treatment: H0040
  - Psychiatric Residential Treatment: T2048
  - Inpatient Admissions

Note: Providers may submit a claim for:

- Psychiatric evaluation services 90791 or 90792 when provided by qualified professional staff when an individual does not meet program admission criteria.
- Crisis Psychotherapy 90839 and 90840 when provided outside of program hours to an individual of the program.

Noncovered Services

The following are not covered:

- Meals and transportation,
- Activity therapies,
- Group activities or other services and programs which are primarily recreational or diversional in nature.
- Outpatient psychiatric day treatment programs that consist entirely of activity therapies.

Partial Hospitalization Psychiatric Care (PHP)/Intensive OP Treatment (IOP) continued

Staffing Ratios:
Staffing should not exceed one staff member per five individuals in the program. Clinical supervision of staff should not exceed one supervisor for six direct care workers.

Core Service Components
Core Components should include:
1. Screening, intake, and assessment services.
2. Referral services.
3. Emergency psychiatric services.
4. Emergency and routine medical services.
5. Physician services.
6. Nursing services.
7. Psychotherapy services (Individual/ Group/Family); and
8. Dietary services.

Treatment Plan
- Services shall be based on a comprehensive, coordinated, and individualized treatment plan, services shall involve the use of multiple, concurrent interventions and treatment modalities.
- Address the underlying causes of the eating disorder, develop coping skills, promote recovery, and reduce the need for a more acute level of care.
- Core services shall be available to individuals on a daily basis, either as part of routine or emergency care.
- ***The treatment plan shall include, but is not limited to, a diagnosis, proposed treatment by type, frequency and duration of treatment, and goals***.

Recertification Requirements PHP
The physician recertification must be signed by a physician who is treating the patient and has knowledge of the patient's response to treatment. The first recertification is required as of the 18th day of partial hospitalization services. Subsequent recertifications are required at intervals established by the provider, but no less frequently than every 30 days. The recertification must specify that the patient would otherwise require inpatient psychiatric care in the absence of continued stay in the partial hospitalization program and describe the following:
A. The patient's response to the therapeutic interventions provided by the partial hospitalization program.
B. The patient's psychiatric symptoms that continue to place the patient at risk of hospitalization.
C. Treatment goals for coordination of services to facilitate discharge from the partial hospitalization program.

Partial Hospitalization Psychiatric Care (PHP)/Intensive OP Treatment (IOP) continued

Recertification Requirements IOP:

The physician recertification must be signed by a physician who is treating the patient and has knowledge of the patient's response to treatment. Recertifications are required at intervals established by the provider, but no less frequently than every 60 days. The recertification must specify that the patient continues to require at least 9 hours of intensive outpatient services and describe the following:

A. The patient's response to the therapeutic interventions provided by the intensive outpatient program.
B. The patient's psychiatric symptoms that continue to place the patient at risk of relapse or hospitalization.
C. Treatment goals for coordination of services to facilitate discharge from the intensive outpatient program.

8430. FAMILY PLANNING and STERILIZATIONS Updated 12/18

Family Planning

- Family planning is any medically approved treatment, counseling, drugs, supplies, or devices which are prescribed or furnished by a provider to individuals of child-bearing age for purposes of enabling such individuals to freely determine the number and spacing of their children.
- Complete the family planning block on the claim form whenever a procedure or service is performed which relates to family planning.
- The following information is provided to facilitate coding the FL 18-28 of the UB-04 paper or electronic equivalent claim form. The two-digit indicator A4 is to be placed in this field.
- The following procedures are family-planning related. The Sterilization Consent Form must be attached to the surgeon's claim at the time of submission. Related claims (anesthesia, assistant surgeon, ambulatory surgery center, hospital, or rural health clinic) do not require an attached Sterilization Consent Form. However, if not attached, processing will be delayed until the consent form with the surgeon's claim is reviewed and determined to be correct.

8430. FAMILY PLANNING and STERILIZATIONS Updated 12/19

Sterilizations

A copy of the Consent for Sterilization form **must** be attached to the surgeon's claim at the time of submission. The form is located on the public and secure websites on the Forms page under the Consent heading. It may be photocopied for your use. A copy of the Consent for Sterilization form does not have to be attached to related claims (anesthesia, assistant surgeon, hospital, or rural health clinic) at the time of submission. **However, a related claim will not be paid until the Consent for Sterilization form with the surgeon's claim has been reviewed and determined to be correct, unless the related claim has the correct Consent for Sterilization form attached.**

- Surgical procedures that render the member sterile (such as hysterectomies) but that are not performed for the purpose of sterilization do not require a Consent for Sterilization form. All requirements outlined in Hysterectomy Coverage Guidelines must be met, including the requirements related to the Hysterectomy Necessity form.

All Sterilization Guidelines

- Sterilizations on mentally incompetent individuals or individuals institutionalized for mental illness are not covered.
- The following guidelines must be accurately followed before reimbursement can be made for any sterilization procedure (including, but not limited to, tubal ligation sterilization and vasectomy). If each item is not followed completely, it will result in the denial of your claim. KMAP or other authorized agencies may ask for documentation at any time, either during the claims processing period or after payment of a claim, to verify services have been provided within program guidelines.

1. The Consent for Sterilization form, mandated by federal regulation, is located on the public and secure websites. Instructions on how to complete the Consent for Sterilization form are attached with the form. Providers may photocopy this form. All voluntary sterilization claims submitted without this specific Consent for Sterilization form will be denied. All fields must be completed, including the physician signature.
2. The Consent for Sterilization form must be signed at least 30 days prior to the date the sterilization is performed with the following exceptions:

   Premature Delivery
   - The date of the member's consent must be at least three calendar days prior to the date the sterilization was performed.
   - The expected date of delivery must be indicated on the consent form and the date of the member's consent must be at least 30 days prior to the expected date of delivery.

   Emergency Abdominal Surgery
   - The date of the member's consent must be at least three calendar days prior to the date the sterilization was performed.
   - The circumstances of the emergency abdominal surgery must be described by the physician sufficiently to substantiate the waiver of the 30-day requirement.

   Note: Three calendar days are used in the above exceptions to guarantee compliance with the minimum federal requirement of 72 hours.
3. The Consent for Sterilization form is valid for up to one year after the expiration date on the form. All signatures and dates must be within the existing time frames.

8430. FAMILY PLANNING and STERILIZATIONS Updated 01/20

Sterilizations continued

4. The individual must be at least 21 years of age or older on the date the consent form is signed, or the sterilization claim will be denied. (This **includes** those situations in which the individual has misrepresented his or her age on the consent form to the provider.) The birth date information provided by KEES will be used to determine whether the individual meets the age requirement. This information can be obtained through Customer Service.
5. Sterilizations on **mentally incompetent individuals** are not covered. "Mentally incompetent individual" is defined as an individual who has been declared mentally incompetent by a federal, state or local court of competent jurisdiction for any purpose, unless the individual has been declared competent for purposes which include the ability to consent to sterilizations" (42 CFR 441.251).
6. The sterilization is not covered when consent is obtained from anyone in labor, under the influence of alcohol or other drugs, or seeking or obtaining an abortion.
7. Interpreters must be provided when there are language barriers, and special arrangements must be made for handicapped individuals.
8. The physician's statement must be signed and dated no more than two days prior to the surgery, the day of the surgery, or any day after sterilization was performed. If this field is left blank, your claim will be denied.
9. The physician statement on the consent form must be signed by the physician who performed the sterilization. No other signatures will be accepted.

STERILIZATION CODES

00840	00851	00921	55250	58565	58579	58600	58605	58611	58615
58661	58670	58671	58700	58720	58940	0567T	0568T		

Transcervical Sterilizations

- Code 58579 is not covered for transcervical sterilization procedures. Codes 58565, 0567T, and 0568T should ~~is to~~ be used. The procedure must meet all sterilization requirements. PA is required.
- The Essure Kit is included in codes 58565, 0567T, and 0568T and should not be billed separately. The invoice does not need to be attached to the claim.
- If a member has had a transcervical hysteroscopy sterilization, a federal Consent for Sterilization form is required. Additionally, three months must have passed before performing code 58340. ICD-10 CM diagnosis code Z302 must be used. PA is not required.

Hysterectomy

- Hysterectomies are covered **only** for medically indicated reasons. Medicaid will reimburse for this service only if at least one of the following three conditions is met and documented.
  The Consent for Sterilization form:
  1. The Hysterectomy Necessity form is completed. The date requirements for the use of the Sterilization Consent Form do not apply to the use of the Hysterectomy Necessity Form.
     OR

Hysterectomy continued

to note this information on the claim, it just needs to be noted on the claim prior to submission for payment.

OR

2. The physician shall certify in writing that the surgery was performed under a life-threatening situation and individual certification was not possible, including a description of the nature of the emergency. This certification must be retained in the patient file and made available upon request. For the claim to process, a statement must be made on the claim indicating the situation was "life-threatening." There is not a specific location to note this information on the claim, it just needs to be noted on the claim prior to submission for payment.

- A total hysterectomy and the removal of tubes/ovaries cannot be billed as separate procedures when performed by the same provider.

HYSTERECTOMY CODES

00846	00944	01962	01963	01969	51925	58150	58152	58180	58200	58210
58240	58260	58262	58263	58267	58270	58275	58280	58285	58290	58291
58292	58294	58541	58542	58543	58544	58548	58550	58552	58553	58554
58570	58571	58572	58573	58951	58953	58954	58956	59525		

Retroactive Eligibility

- If a hysterectomy is performed during a retroactive eligibility period for a Medicaid member, the performing physician can sign and submit a statement indicating the retroactive eligibility. This statement must include the following verbiage:
  - The member has retroactive eligibility.
  - The member was informed prior to the surgery that the surgery would make her sterile.
- The document does not need to be signed by the member.
- This information can be documented on the claim; however, a signed statement by the physician must be kept on file and available on request.

(LARC) Long-acting Reversible Contraceptives

Effective with dates of service on and after January 1, 2023, long-acting reversible contraceptives (LARCs), intra uterine devices (IUDs) and implants, are no longer included in the Diagnosis Related Group (DRG) rate.

- The hospital will bill KMAP and be reimbursed on a fee-for-service (FFS) basis.
- LARCs must be billed on a UB04 form with bill type 131 or 851 using the acute hospital National Provider Identifier (NPI) number. The provider will bill on a CMS 1500 Form utilizing procedure code 58300 or procedure code 11981.
- An outpatient claim including the LARC, and the procedure code should be submitted separately from the inpatient claim.
- An exception to the inpatient/outpatient claims edits for same day billing will be allowed for this drug and the procedure codes.

APPENDIX I

CODES Updated 05/17

KDHE Division of Health Care Finance (DHCF) requires KMAP hospital billers to submit claims using the HCPCS. HCPCS is a combination of codes which includes CPT codes created and controlled by the American Medical Association (AMA); Centers for Medicare & Medicaid Services (CMS) codes created and controlled by CMS; and local codes created and controlled by the regional CMS office. HCPCS codes consist of a five-digit base code with the capability of being up to thirteen digits in length when modifiers are used. A modifier code is a two-digit code that identifies a specific type of service, for example, anesthesia, or a variation of the service identified by the base code. Charts have been developed to assist providers in understanding how KMAP will handle specific modifiers. The Coding Modifiers Table and Ambulance Coding Modifiers Table are available on both the public and secure portions of the website. They can be accessed on the KMAP Reference Codes page. Information is available on the American Medical Association website.

Not all codes are covered. Please use the following resources to determine coverage and pricing information. For accuracy, use your provider type and specialty as well as the member ID number or benefit plan.

- Information is available on the public website.
- Information is available on the secure website under Pricing and Limitations.

For further assistance, contact Customer Service at 1-800-933-6593. (Refer to **Section 1000** of the *General Introduction Fee-for-Service Provider Manual*.)

All claims must be coded with the appropriate codes. Claims which only describe the service and do not provide the code will be denied. When a code is not available, the service is noncovered by KMAP. Not otherwise classified (NOC) codes are usually noncovered. (Refer to **Section 4200** of the *General Special Requirements Fee-for-Service Provider Manual*.)

APPENDIX II

Updated 09/11

Hospital Cost Report

To be eligible for payment from KMAP, each hospital located in Kansas must complete, sign, and submit a copy of the cost report form (CMS 2552-96). An electronic copy of the Electronic Cost Report (ECR) and Print Image (PI) files are required along with the signed certification page. This must be done annually.

The cost report and its instructions can be obtained from Medicare.

Numerous private vendors offer services to assist in completing this cost report. KDHE-DHCF has adopted this cost report since it is already used by hospitals enrolled in the Medicare program. KDHE-DHCF does not require any Medicaid specific schedules to be completed, although they may be referred to in the instructions. All general schedules of the report must be completed.

Submit the report to the following address:

Myers and Stauffer, LC.
Certified Public Accountants
4123 SW Gage Center Drive, Suite 200
Topeka, KS 66604-1833

For questions regarding the cost report, contact the above company at:

Telephone: 800-255-2309
785-228-6700
Fax: 800-228-6701
Email: KSCOST@mslc.com

State of Kansas - CY26 DRG Rebase and Recalibration
Final Hospital Base Rates

Notes: GME factors are reported as the decimal equivalent of the percent increase.
For example, a GME factor of 0.15 represents a 15% increase, and it is applied by multiplying the Base Rate w/o GME by 1.15.
